The asset pricing results are based on the three increasingly restrictive assumptions: absence of arbitrage, single-agent optimality, and equilibrium.

Dynamic Asset Pricing Theory (Provisional Manuscript)

Fundamental theorem of asset pricing. The fundamental theorems of asset pricing (also: of arbitrage, of finance) provide necessary and sufficient conditions for a market to be arbitrage free and for a market to be complete. An arbitrage opportunity is a way of making money with no initial investment without any possibility of loss.
