Poetry. "I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page." With these words, Kenneth Goldsmith embarked upon a project which he termed "uncreative writing", that is: uncreativity as a constraint-based process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then

reframed into the discourse of literature.

"When I reach 40, I hope to have cleansed myself of all creativity"-Kenneth Goldsmith.

Chronicling his 13 years as CEO of Circuit City

during its most successful time and sharing his insightful analysis of its downfall, Alan Wurtzel imparts a wisdom that is a must-read for anyone even remotely interested in business. “Good to Great to Gone illustrates the vital importance of listening to your customers. Without them your company has nothing.” ?Tony Hsieh, New York Times bestselling author of *Delivering Happiness* and CEO of Zappos.com, Inc. How did Circuit City go from a Mom and Pop store with a mere \$13,000 investment, to the best performing Fortune 500 Company for any 15-year period between 1965 and 1995, to bankruptcy and liquidation in 2009? What must leaders do not only to take a business from good to great, but to avoid plummeting from great to gone in a constantly evolving marketplace? For almost 50 years, Circuit City was able to successfully navigate the constant changes in the consumer electronics marketplace and meet consumer demand and taste preferences. But with the company’s subsequent decline and ultimate

demise in 2009, former CEO Alan Wurtzel has the rare perspective of a company insider in the role of an outsider looking in. Believing that there is no singular formula for strategy, Wurtzel emphasizes the “Habits of Mind” that influence critical management decisions. With key takeaways at the end of each chapter, Wurtzel offers advice and guidance to ensure any business stays on track, even in the wake of disruption, a changing consumer landscape, and new competitors. Part social history, part cautionary tale, and part business strategy guide, *Good to Great to Gone: The 60 Year Rise and Fall of Circuit City* features a memorable story with critical leadership lessons.

Mainland China businesses are going global, transforming the country from a manufacturing export platform into an overseas investment powerhouse. China Goes Global is the most thorough and up-to-date empirical analysis of the accelerating effort of Chinese companies to go global by investing overseas. It details the overall trends of this activity with respect to its sectors, channels, overseas targets, and particular firms, along the role of Chinese

Government policy in facilitating business enterprise globalization. The book offers readers an enterprise level of view outward expansion by Chinese firms that is focused not only on the big-names, but also less well-known, but equally important trailblazing enterprises. In doing so it offers practical suggestions on how firms can tackle the challenges encountered when expanding outward.

This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold

---

questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

From one of the most respected economic thinkers and writers of our time, a brilliant argument about the history and future of economic growth. The years since the Great Crisis of 2008 have seen slow growth, high unemployment, falling home values, chronic deficits, a deepening disaster in

---

Europe—and a stale argument between two false solutions, “austerity” on one side and “stimulus” on the other. Both sides and practically all analyses of the crisis so far take for granted that the economic growth from the early 1950s until 2000—interrupted only by the troubled 1970s—represented a normal performance. From this perspective, the crisis was an interruption, caused by bad policy or bad people, and full recovery is to be expected if the cause is corrected. The *End of Normal* challenges this view. Placing the crisis in perspective, Galbraith argues that the 1970s already ended the age of easy growth. The 1980s and 1990s saw only uneven growth, with rising inequality within and between countries. And the 2000s saw the end even of that—despite frantic efforts to keep growth going with tax cuts, war spending, and financial deregulation. When the crisis finally came, stimulus and automatic stabilization were able to place a floor under economic collapse. But they are not able to bring about a return to high growth and full employment. In *The End of Normal*, “Galbraith puts his pessimism into an engaging, plausible frame. His contentions deserve the attention of all economists and serious financial minds across the political spectrum” (Publishers Weekly, starred review).
