If any country was born to holiday, it's Australia. Sun, space, beaches - the desire to hit the road and "get out of town" remains a strong and enduring part of our cultural identity. Many of us remember the summer ritual of packing up the car with half the stuff we owned and heading for our chosen "spot" in often incident-packed road trips. Central to those memorable journeys was the motel. "We'll stay a night in Gundagai," Dad would say, to break up the trip. Discovering the configuration of a new motel was all part of the holiday adventure - did it have a colour TV? The little packs of cereal? A couple of complimentary Arrowroots to go with the free tea and coffee? Bricks on the inside as well as the out? In his new book Motel, Tim Ross captures the heyday of Australia's motels via a deep trawl through the National Archives, presenting a fascinating slideshow of Australians on holidays between 1950 and 1989. A pictorial love letter to a somewhat bygone era, it captures the accessible glamour and car-friendly convenience of the road-side motel, from Gold Coast 'palaces' to out-of-the-way comfort stops (some with attached restaurant! Dinner: 6.30-8pm). Motel is an affectionate tribute to one of this country's greatest democratic institutions. From Prime Ministers to punters, at some stage we've all had to lay our head down at a welcoming motel as the sun sets on the highway.

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a back drop for a new collection of nostalgic short stories.

Weird But True 1: Expanded Edition Springer

THIS IS A PRELIMINARY VERSION AND NEEDS MORE POLISHING - but to my knowledge it is still a very good documentation, as there is not much available in English now. The more polished version will need a couple of months - and the PRELIMINARY VERSION will then disappear. But I use it now as is and expand it. If there is an interest, the same can be published as print book. Actually for me the print version is the more important. From the Introduction: IchigoJam - a learning programming for children and other interested parties; a project in Japan mainly. The language used is BASIC. Is this a good starting point? Well, I wonder, how many of the millions of programmers nowadays have started with BASIC. And BASIC was good enough for them then. This project is aimed at the younger generation, and to get started. If they get into programming at let's say 10, it will take another 10 or more years if they do it as a profession - so the main aim is to attract the young generation into it, get some experience in how to write some little or more complex applications or examples. And nobody knows know, which language is the most important then. Rather than a PC, it is completely independent of any other hardware. It has as display - a low cost small monitor, as used in cars for rear view cameras. The central chip is an NXP1114 ARM processor. At the time of design, there was no low-cost chip with on-board USB available. So, a PS/2 keyboard was used - but here with a little interface that changes PS/2 to a USB connector. Add a 5V power supply - for example as used for the Raspberry PI - and a 12V power supply for the little monitor, and programming can start. Or use a couple of batteries or rechargeable NMH cells and be independent. And where is the Internet connection? There is none - and this actually adds to the system: children can be left on their own with no danger to go where they should not. I had the opportunity to get one of these boards, so a new project started. Let's see what can be done to support this. There is a very active facebook group in Japanese and one in English - but translation works quite well - so no real issue. But this was the issue for me, most of the data is in Japanese, and there are not enough code examples for me. I contacted the relevant people in Japan and asked for permission to use some of the material for this book. As I walk through the different instructions, I can as well document what I do - and add it to the material here. Aimed for others to try out and get comfortable. This little board is very attractive for me, as I like minimal hardware solutions: The chip in the middle, Female headers as a way to connect to all of the pins The video output, the connector for power, the USB connector for the keyboard, A 5 pin expansion connector. Raspberry PI is another option to run this IchigoJam BASIC software - just download, install the IchigoJam software and you have your new system. Most of the BASIC instructions work on the RPI version. IchigoJam PC-based is another option to get started. Completely web-based, but then unfortunately no IO pins for additional hardware. I hope this book IchigoJam - My Reference helps to spread the message and can be used as a printed documentation as a next step - easily available everywhere via amazon. At the end of the book you find a list of links that I found. There might be better ones to be added. And they can be added to a later version. Enjoy reading and/or using and send feedback

This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice.

This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

21st Century Learning Environments Andrew Goodman

Barbara La Marr's (1896--1926) publicist once confessed: "There was no reason to lie about Barbara La Marr. Everything she said, everything she did was colored with news-value." When La Marr was sixteen, her older half-sister and a male companion reportedly kidnapped her, causing a sensation in the media. One year later, her behavior in Los Angeles nightclubs caused law enforcement to declare her "too beautiful" to be on her own in the city, and she was ordered to leave. When La Marr returned to Hollywood years later, her loveliness and raw talent caught the attention of producers and catapulted her to movie stardom. In the first full-length biography of the woman known as the "girl who was too beautiful," Sherri Snyder presents a complete portrait of one of the silent era's most infamous screen sirens. In five short years, La Marr appeared in twenty-six films, including *The Prisoner of Zenda* (1922), *Trifling Women* (1922), *The Eternal City* (1923), *The Shooting of Dan McGrew* (1924), and *Thy Name Is Woman* (1924). Yet by 1925 -- finding herself beset by numerous scandals, several failed marriages, a hidden pregnancy, and personal prejudice based on her onscreen persona -- she fell out of public favor. When she was diagnosed with a fatal lung condition, she continued to work, undeterred, until she collapsed on set. She died at the age of twenty-nine. Few stars have burned as brightly and as briefly as Barbara La Marr, and her extraordinary life story is one of tempestuous passions as well as perseverance in the face of adversity. Drawing on never-before-released diary entries, correspondence, and creative works, Snyder's biography offers a valuable perspective on her contributions to silent-era Hollywood and the cinematic arts.
