This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as

the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. Author's website: www.relativity.ch.

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed,

but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

A Journey Hay House, Inc

Is secularism a positive force in the modern world? Or does it lead to fragmentation and disintegration? In *Saving Leonardo*, best-selling award-winning author Nancy Pearcey (Total Truth, coauthor *How Now Shall We Live?*) makes a compelling case that secularism is destructive and dehumanizing. Pearcey depicts the revolutionary thinkers and artists, the ideas and events, leading step by step to the unleashing of secular worldviews that undermine human dignity and liberty. She

crafts a fresh approach that exposes the real-world impact of ideas in philosophy, science, art, literature, and film--voices that surround us in the classroom, in the movie theater, and in our living rooms. A former agnostic, Pearcey offers a persuasive case for historic Christianity as a holistic and humane alternative. She equips readers to counter the life-denying worldviews that are radically restructuring society and pervading our daily lives. Whether you are a devoted Christian, determined secularist, or don't know quite where you stand, reading *Saving Leonardo* will unsettle established views and topple ideological idols. Includes more than 100 art reproductions and illustrations that bring the book's themes to life. Praise for *Saving Leonardo*: "A feast for the mind and for the eye. Nancy Pearcey not only is a trustworthy guide for a nuanced discussion on the relationship between culture and the gospel, but she is a gifted teacher as well . . . *Saving Leonardo* is a rare, precious gift to the churches and universities alike." Makoto Fujimura, artist and author of *Refractions: A Journey of Faith, Art, and Culture* "Nancy Pearcey has done it again and better than ever. She has taken the complex sophistication of the best cultural analysis and laid it out for any person to grasp, enjoy and use to live out their daily lives honoring Christ. An astounding accomplishment!" James W. Sire, author of *The Universe Next Door* "G. K. Chesterton said 'the danger when Men stop believing in God is not that they'll believe in nothing; but that they will believe in anything.' Nancy Pearcey understands where believing in anything leads and in this book she reveals where a secular philosophy is taking us. A balanced, fair, and impacting work!" Cal Thomas, syndicated and USA Today columnist "Nancy Pearcey helps a new generation of evangelicals to understand the worldview challenges we now face and to develop an intelligent and articulate Christian understanding . . . *Saving Leonardo* should be put in the hands of all those who should always be ready to give an answer--and that means all of us." R. Albert Mohler, Jr., president, The Southern Baptist Theological Seminary "Nancy Pearcey is an intellectual prophet in our day

and one of Evangelicalism's foremost cultural observers. *Saving Leonardo* is a tour de force. In it, Pearcey provides a penetrating analysis of the nature of contemporary secularism, a helpful exposition of how we got to the present situation, and a well-crafted strategy for changing the situation. This is her best effort yet . . . a must read." J. P. Moreland, distinguished professor of Philosophy, Biola University and author of *The God Question* "Nancy Pearcey is unsurpassed in the current generation of Christian thinkers . . . The magic continues with this book. Pearcey's virtues as a writer and thinker are once again fully evident in the range of material that she has mastered, the encyclopedic collection of data that she presents, and the analytic rigor with which she separates truth from error in worldviews. She is a prophetic voice for contemporary Christians." Leland Ryken, Clyde S. Kilby professor of English, Wheaton College "Brilliant . . . The book brings complex, abstract ideas down-to-earth -- or rather, down-to-life. . . . *Saving Leonardo* bridges the gaps between the arts and the sciences, the theoretical and the practical. The book not only argues for the unity of Christian truth but exemplifies that unity and shows it in action." Gene Edward Veith, provost, Patrick Henry College

Written by one of the most successful aerospace authors, this new book develops aircraft performance techniques from first principles and applies them to real airplanes. It also addresses a philosophy of, and techniques for aircraft design. By developing and discussing these two subjects in a single text, the author captures a degree of synergism not found in other texts. The book is written in a conversational style, a trademark of all of John Anderson's texts, to enhance the readers' understanding.

Three years ago, Geoff Whittington was overweight, overworked and resigned to a premature death from a catalogue of health conditions. His two sons stepped in with a radical diet and fitness regime, based on the latest scientific research. In the next six months, Geoff lost 5 stone and reversed his diabetes. He went from being an obese, barely mobile night-time security guard to a fighting-fit endurance cyclist. Best of all, he got back his motivation and enjoyment of life. In this book, the Whittingtons show you how they did it...and share their simple diet and fitness plan to enable you to do it too.

"This volume explores some of the 21st century's most challenging questions in international peace and security, with a focus on a crucial region: South Asia. The authors have done a great public service by straightforwardly and lucidly presenting their penetrating analyses to a general readership." Lee H. Hamilton, President and Director of the Woodrow Wilson International Center for Scholars and former Vice Chairman of the 9/11 Commission. "South Asia at a Crossroads is an important contribution to the literature on global peace and security. The book brings together a broad range of perspectives - both global and regional - on complex security challenges, especially those underlined by science and technology. The book should be a valuable resource for all those who want to better understand the various dimensions of the conflict in South Asia." Professor Paolo Cotta-Ramusino is the Secretary General of the International Pugwash Conferences on Science and World Affairs, which was awarded the Nobel Peace Prize in 1995. He is a Professor of Physics at the University of Milan, Italy.

In 2010, Nick Polizzi did something

unimaginable. He assembled a group of eight desperately ill patients from around the world and brought them into the heart of the Amazon rainforest to put the mysterious medicines of native shamans to the test. The healing journey that unfolded would change their lives—and his own—forever. In *The Sacred Science*, we join Nick as he explores these primordial traditions and learns firsthand what it takes to truly heal ourselves of physical disease, emotional trauma, and the sense of “lostness” that so many of us feel in these modern times. We venture into a place where the ordinary rules we live by, even survival instincts, don’t apply—where “the only thing to do is to step forward and be ready for anything.” Nick is not a guru or shaman; he is an ordinary guy who pieced together an illuminating journey, one experience at a time. In this riveting true story, we’re shown the many layers that must be peeled away in order for us to find the truth of who we are and why we’re here. This book is a bridge between the flashy, fast-moving modern world and the forgotten ways of a healthier, earth-connected ancestral past. You’ll find practices and principles of native wisdom that you can put to use in your own life, and you’ll gain a new understanding of what it means to heal. In the end, what will become of the eight patients who set out on this path with Nick? Will the exotic jungle medicines and harrowing rites of passage destroy them or give them a new lease on life? Five will return with remarkable healing results. Two will return disappointed. One won’t return at all.
