AM » The paddles require a
custom screw that both fastens
the frame to the tie rods but
also provides a surface for the
float brackets to pivot upon.

Edgar T Westbury is rightly
recognized as a pioneer in the
field of internal combustion
engine design for model use,
although his achievements
range far broader than that
alone. These pages were pieced
together as a tribute to the man
and his work in this field.

E. T. Westbury described this engine as a type well suited to model marine work, its size suitable for fairly powerful prototype boats such as tugs, pinnaces or fast packet liners up to 6ft or more in length. This form of assembly calls for careful location of the pillars, both at the bedplate end and in the cylinder base flange.
