A career engineer at Studebaker, Harold E. Churchill became president of the recently merged Studebaker-Packard Corporation in 1956, at a time when finances were shaky and an aging product line was losing ground to the Big Three. Quickly launching a program of "realism and common sense," he focused the company's energies on a few selected market segments where he saw opportunities for gain. His vision for a compact economy car led to the Lark, the hit model that Studebaker desperately needed. This thorough examination of Churchill's leadership of Studebaker-Packard draws upon Board of Directors minutes, internal

documents, oral histories and media reports in constructing a detailed account of these crucial years. In addition to covering the cars and trucks produced under Churchill in detail, it closely traces Churchill's actions as president and analyzes his motivations, the pressures he faced, his leadership style and the success or failure of his tenure.

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that

have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Amateur road racer, raconteur and car guy extraordinaire, Anatoly Arutunoff tells a lifetime of his favorite true first person stories. From his youth in Bartlesville, Oklahoma, to participation at the real Targa Florio, to eventually winning the SCCA runoffs in his Morgan 4/4, to more recent times on the historic rally circuit Toly makes you think you were there sharing all the adventures and camaraderie. There are intriguing family moments, the exuberance of youth and brushes with greats such as Redman, Clark and Moss plus many lesser known players from the past sixty years who collectively molded the sports car culture that has always surrounded the author. Written in an uncomplicated and light-hearted style the reader will either renew a relationship or discover a new friend in a man who suggests, "All the car stuff I've done is a sort of cross-section of what you would have done, if you'd been young in the

sixties and had the money." Ride with Toly on the roads and racetracks in America and Europe and share in an experience that is truly "One Off!"

How to Modify BMW E30 3 Series CarTech Inc Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In Memoirs of a Hack Mechanic, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars,

---

including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).
