If your BMW check engine light (or service engine soon light) stays on, it means that the Onboard

Diagnostic System (also known as Digital Motor Electronics DME) has detected a problem with the emission system, engine, or transmission. BMW check engine light may come on due to something as simple as a loose gas cap, but it can also indicate an expensive engine or transmission problem.

[How to RESET the SERVICE Light on a BMW 3 Series E90, E91 ...](#)

Don't crank the engine—just turn it to the accessory position. Keep

holding the odometer button until the service light starts flashing and you see the word “reset” come up on the dashboard. Release the odometer button and then briefly press down on it again until you see a series of green LED lights illuminate on the dashboard.

When the engine light comes on, it should be taken seriously. Take help of automotive

specialist.

Possible explanations for the engine light coming on may include something as simple as the gas cap not being properly screwed on tight.

This can trigger the light to illuminate because the vehicle is detecting an issue with its emissions system. While this issue does not require the help of a professional, it is likely that the problem is more serious.
