Management Information Systems Nirali Prakashan

The field of Information Systems has been evolving since the first application of computers in organizations in the early 1950s. Focusing on information systems analysis and design up to and including the 1980s, the field has expanded enormously, with our assumptions about information and knowledge being challenged, along with both intended and unintended consequences of information technology. This prestige reference work offers students and researchers a critical reflection on major topics and current scholarship in the evolving field of Information Systems. This single-volume survey of the field is organized into four parts. The first section deals with Disciplinary and Methodological Foundations. The second section deals with Development, Adoption and Use of MIS – topics that formed the centrepiece of the field of IS in the last century. The third section deals with Managing Organizational IS, Knowledge and Innovation, while the final section considers emerging and continuing issues and controversies in the field – IS in Society and a Global Context. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing relevant debates. This prestigious book is required reading for any student or researcher in Management Information Systems, academics and students covering the breadth of the field, and established researchers seeking a single-volume repository on the current state of knowledge, current debates and relevant literature.

#### Management Information Systems Irwin/McGraw-Hill

Exceptionally practical in approach, this book prepares learners for the constantly changing demands of using information systems as managers in today's fast-paced organizations--first by relating MIS to management, the organization and technology, focusing on the importance of integrating these elements; second by tracking emerging technologies and organizational trends; and third by consistently using examples taken from real businesses, both domestic and foreign. A four-part organization covers organizations, management and the networked enterprise; information technology infrastructure; management and organizational support systems for the digital firm; and building information systems in the digital firm. For business managers in the 21st century.
