to help develop evolutionary theory. **early ideas about evolution Flashcards and Study Sets ...** MAIN IDEA Early scientists proposed ideas about evolution. Although Darwin rightly deserves much of the credit for evolutionary theory as we know it today, he was not the first person to come up with the idea. Evolution is

the process of biological change by which descendants come to differ from their ancestors. *Ch 10.1 Early Ideas about Evolution Flashcards | Quizlet* Lamarck's contributions to the idea of evolution presented evolution as occurring due to environmental change over long periods of time. Thought that a giraffe's long neck evolved from reaching high in trees. Inheritance of acquired characteristics **10.1 Early Ideas About Evolution Flashcards |**

**Quizlet** Early Concepts of Evolution: Jean Baptiste Lamarck Darwin was not the first naturalist to propose that species changed over time into new species—that life, as we would say now, evolves. In the eighteenth century, Buffon and other naturalists began to introduce the idea that life might not have been fixed since creation. 10.1 Early Ideas About Evolution Section 4 Evidence of Evolution

---

## Objectives

- Describe how the fossil record supports evolution.
- Infer on how comparative anatomy and development of living species provides evidence of evolution.

- Summarize how proteins and DNA are used as evidence of evolution.

- Summarize the process of species formation. Chapter 10
