## **Evolutionary origin of religions - Wikipedia**

The evolutionary origin of religions and religious behavior is a field of study related to evolutionary psychology, the origin of language and mythology, and cross-cultural comparison of the anthropology of religion. Some subjects of interest include Neolithic religion, evidence for spirituality or cultic behavior in the Upper Paleolithic, and similarities in great ape behavior

**Section 1 : Early Ideas About Evolution Study Guide A ...**

Early Concepts of Evolution: Jean Baptiste Lamarck. Darwin was not the first naturalist to propose that species changed over time into new species—that life, as we would say now, evolves. In the eighteenth century, Buffon and other naturalists began to introduce the idea that life might not have been fixed since creation.

## **Early Ideas about Evolution**

10.1 Early Ideas About Evolution KEY CONCEPT There were theories of biological and geologic change before Darwin. MAIN IDEAS • Early scientists proposed ideas about evolution. • Theories of geologic change set the stage for Darwin's theory. VOCABULARY evolution, p. 298 species, p. 298 fossil, p. 300 catastrophism, p. 301 gradualism, p. 301
