Early Ideas About Evolution Study

Early Concepts of Evolution: Jean Baptiste Lamarck Darwin was not the first naturalist to propose that species changed over time into new species—that life, as we would say now, evolves. In the eighteenth century, Buffon and other naturalists began to introduce the idea that life might not have been fixed since creation.

Early Ideas About Evolution Study

Key Concept- There were theories of biological and geological change before Darwin. Main Idea 1- Early scientists proposed ideas about evolution. Main Idea 2- Theories of geological change set the stage for Darwin.
