The signals are everywhere that our planet is experiencing significant climate change. It is clear that we need to reduce the emissions of carbon dioxide and other greenhouse gases from our atmosphere if we want to avoid greatly increased risk of damage from climate change. Aggressively pursuing a program of emissions abatement or mitigation will show results over a timescale of many decades. How do we actively remove carbon dioxide from the atmosphere to make a bigger difference more quickly? As one of a two-book report, this volume of *Climate Intervention* discusses CDR, the carbon dioxide removal of greenhouse gas emissions from the atmosphere and sequestration of it in perpetuity. *Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration* introduces possible CDR approaches and then discusses them in depth. Land management practices, such as low-till agriculture,

reforestation and afforestation, ocean iron fertilization, and land-and-ocean-based accelerated weathering, could amplify the rates of processes that are already occurring as part of the natural carbon cycle. Other CDR approaches, such as bioenergy with carbon capture and sequestration, direct air capture and sequestration, and traditional carbon capture and sequestration, seek to capture CO<sub>2</sub> from the atmosphere and dispose of it by pumping it underground at high pressure. This book looks at the pros and cons of these options and estimates possible rates of removal and total amounts that might be removed via these methods. With whatever portfolio of technologies the transition is achieved, eliminating the carbon dioxide emissions from the global energy and transportation systems will pose an enormous technical, economic, and social challenge that will likely take decades of concerted effort to achieve. *Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration* will help to better understand the potential cost and performance of CDR strategies to inform debate and decision making as we work to stabilize and reduce atmospheric concentrations of carbon dioxide.

IT ALL HAPPENED SO FAST  
One minute the two space Hab astronauts were scoop-diving the atmosphere, the next they'd been shot down over the North Dakota Glacier and were the object of a massive manhunt by the United States government. That government, dedicated to saving the environment from the evils of technology, had been voted into power because everybody knew that the Green House Effect had to be controlled, whatever the cost. But who would have thought that the cost of ending pollution would include not only total government control of day-to-day life, but the onset of a new Ice Age Stranded in the anti-technological heartland of

America, paralyzed by Earth's gravity, the "Angels" had no way back to the Space Habs, the last bastions of high technology and intellectual freedom on or over the Earth. This remarkable workbook reveals a system that shows you how to learn faster, easier and without frustration. By mastering the hidden language of the subject and exams, you will be poised to tackle the toughest of questions with ease. We've discovered that the key to success on the Earth Science Regents Exam lies with mastering the Insider's Language of the subject. People who score high on their exams have a strong working vocabulary in the subject tested. They know how to decode the vocabulary of the subject and use this as a model for test success. People with a strong Insider's Language consistently: Perform better on their Exams Learn faster and retain more information Feel more confident in their courses Perform better in upper level courses Gain more satisfaction in learning The Earth Science Regents Exam Vocabulary Workbook is different from traditional review books because it focuses on the exam's Insider's Language. It is an outstanding supplement to a traditional review program. It helps your preparation for the exam become easier and more efficient. The strategies, puzzles, and

questions give you enough exposure to the Insider Language to use it with confidence and make it part of your long-term memory. The Earth Science Regents Exam Vocabulary Workbook is an awesome tool to use before a course of study as it will help you develop a strong working Insider's Language before you even begin your review. Learn the Secret to Success! After nearly 20 years of teaching Lewis Morris discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of workbooks and applications to teach this "Insider's Language" to students around the world.
