Life Space Management is a book that throws up a new concept of enhancing individual & organisational effectiveness by managing the parameters of Life Space, a word coined by Kurt Lewin. Our entire effectiveness in life depends on how well we create space with others in the environment. All of us intrinsically yet unknowingly practice the art of creating the right space, whenever we interact with others. Our entire relationship blooms and grows or diminishes based on the quantum of life space we create with them. The author has researched on this new subject and put across his views to help the reader evolve and grow more effective in life.
