****This is a retelling of book 1 of Zodiac Academy from the perspective of Orion, Darius, Caleb, Seth and Max**** The Vega twins are alive. Those five words circle in my mind like an oncoming storm. They change everything about the future we thought had been set in stone. They challenge everything we were raised to be and the stability of the entire kingdom. They're coming to our academy looking for the life that was stolen from them, but we can't let them take it back. So much hangs in the balance and we can't risk the arrival of two naïve princesses destroying everything we worked so hard for. I have trained in dark magic, overcome all challenges and stood in the shadow of Lionel Acrux for far too long already. I won't let them come between me and his downfall. Which means they have to go before they discover how powerful they truly are. This is a retelling of the first book in the Zodiac Academy series from the point of view of Orion and the Heirs and should be read after you have finished the original story. It includes scenes from alternative points of view as well over 50k words of additional content and scenes which have never before been revealed. So prepare to step into the dark minds of the Zodiac boys and watch out for the heartbreak and carnage that will ensue.

This is the first book to introduce the new statistics - effect sizes, confidence intervals, and meta-analysis - in an accessible way. It is chock full of practical examples and tips on how to analyze and report research results using these techniques. The book is invaluable to readers interested in meeting the new APA Publication Manual guidelines by adopting the new statistics - which are more informative than null hypothesis significance testing, and becoming widely used in many disciplines. Accompanying the book is the Exploratory Software for Confidence Intervals (ESCI) package, free software that runs under Excel and is accessible at www.thenewstatistics.com. The book's exercises use ESCI's simulations, which are highly visual and interactive, to engage users and encourage exploration. Working with the simulations strengthens understanding of key statistical ideas. There are also many examples, and detailed guidance to show readers how to analyze their own data using the new statistics, and practical strategies for interpreting the results. A particular strength of the book is its explanation of meta-analysis, using simple diagrams and examples. Understanding meta-analysis is increasingly important, even at undergraduate levels, because medicine, psychology and many other disciplines now use meta-analysis to assemble the evidence needed for evidence-based practice. The book's pedagogical program, built on cognitive science principles, reinforces learning: Boxes provide "evidence-based" advice on the most effective statistical techniques. Numerous examples reinforce learning, and show that many disciplines are using the new statistics. Graphs are tied in with ESCI to make important concepts vividly clear and memorable. Opening overviews and end of chapter take-home messages summarize key points. Exercises encourage exploration, deep understanding, and practical applications. This highly accessible book is intended as the core text for any course that emphasizes the new statistics, or as a supplementary text for graduate and/or advanced undergraduate courses in statistics and research methods in departments of psychology, education, human development, nursing, and natural, social, and life sciences. Researchers and practitioners interested in understanding the new statistics, and future published research, will also appreciate this book. A basic familiarity with introductory statistics is assumed.

Dungeon Desolation First Second

Cruel. Heartless. Quarantined. The ruthless boys of Everlake Prep never saw lockdown coming. But the virus isn't their number one enemy. I am. And as if being confined to a boarding school for the elite wasn't bad enough, now I'm stuck in isolation with the boys who hate me most too. Saint, Kyan and Blake. The Night Keepers. Or so they call themselves. They've embodied the Native American legend which lives in this valley, taking on the role of the monsters who lurk in the forest. And though they act like beasts, they may also be the most tempting creatures I've ever seen. With the virus escalating and my dad's name splashed through the news, my entire world is falling apart. What he did has cast a dark shadow over me. And the Night Keepers want to make me pay for his crimes. Then things went from bad to worse when I touched the sacred rock. A rock which supposedly holds a curse to bind me as the Night Keepers' slave. And as crazy as it sounds, I decided to play along. Because there are things about me they don't know. Things my dad has hidden from me for years. All I can be sure of is that I have to find a way to escape this school. But until then, those savage boys are making my life a living hell. As the virus sweeps through the country and the world twists into something ugly and unknown, the kings of this school become true monarchs. Even the teachers bow to them now. And I'm kinda glad about that 'stay six feet away from one another' rule, because without it, I know they'd rip me apart. At least there's a silver lining. I'm cosying up to Coach Monroe. My hot as hell, brooding P.E. teacher who has a vendetta of his own against the Night Keepers. And with his help, I may succeed at doing more than escaping the clutches of these heartless fiends. I might even destroy them along the way. My father taught me how to be strong. How to prepare for the end of the world. So this isn't going to be the end of my world, mark my words. But if I'm able to use my mind and body to bring these assholes to their knees, it might just be the end of theirs. This is a high school bully reverse harem series which means the main character will end up with multiple love interests. It may have triggers for some as it has off the charts angst, dark love-hate themes, scenes of intense bullying, sexual scenes and some violence (not aimed towards the main character) and is not for the faint of heart. Prepare to enrol at Everlake Prep. Bring your hand sanitiser, face masks and toilet paper to barter with, but don't expect to hold onto them for long. Because it's time to go into quarantine with the Night Keepers. And everything you own now belongs to them.

This highly visual book explores the seldom-told story of how glamour, fashion, design, and styling became the main focus of automotive marketing from the postwar 1940s through the 1970s. With the expansion of the American suburbs after WWII, women suddenly needed cars of their own. By adopting the fashion industry's yearly model changes, as well as hiring many designers and stylists from the fashion industry, the automobile industry made a direct appeal to the rising sophistication and influence of women. By perfecting the fashion-centric concept of planned obsolescence, it became the dominant economic engine of American postwar prosperity. The dramatic photography, elegant fashion, and use of color and materials in midcentury automotive marketing created a groundswell of demand for new cars. Much of the marketing imagery of the period hasn't been published since it first came out, and this book features some of the best.

The Kennedy Half-Century Upco's the Physical Setting Review - Earth ScienceEarth Science Review Book is user friendly for both the teacher and the student. Since the content is aligned with the New York State Core Curriculum for Physical Setting/Earth Science, a teacher can feel confident that all the required topics are sufficiently developed. The suggested outline of units moves from the concrete material to the more abstract subjects such as meteorology and astronomy. Throughout the book there is ample opportunity for review of basic skills and ways to tie in the various units. For example, isolines are discussed early in the year and then revisited later in the weather topics. The student has the opportunity to use the book as both a reference and a workbook. The extensive number of constructed response items as well as multiple choice questions found interspersed within the topics give ample practice. The multiple Regents Exams found at the back of the book can be used both at the end of the course for review and whenever appropriate throughout the year. Dark Fae Age of Vampires

Now a complete series What do a heartless Dragon Shifter, a cold-blooded Basilisk, an arrogant Lion Shifter and a brooding, tattooed Harpy have in common...? Me. Elise Callisto. Vampire. Angel of vengeance. And a girl on a mission to destroy one of them for murdering my brother. I just don't know which one did it yet. When I interrogated/accidentally killed a Werewolf who was high on a new and dangerous drug called Killblaze, his final words painted a dark reality for me. The King of Aurora Academy killed my brother. The trouble is, there's four kings at the academy and each of them have motive and bloodthirsty natures. Aurora Academy isn't a place for the faint of heart. To put it lightly, my town is the cesspit of Solaria where the most cutthroat Fae in the kingdom reside. The school itself is divided by the two gangs who run this city. The Lunar Brotherhood and the Oscura Clan. And guess what? Two of the kings run the gangs at the academy, their hatred for each other so fierce I hear a day doesn't go by without blood being spilled in the halls. I might be a petite, lilac-haired girl who looks like I couldn't hurt a fly, but they haven't been introduced to my fangs yet. And they don't know why I'm really here. Or that I'll do whatever it takes to bring down the Fae who took my flesh and blood from me. I don't believe in fate, but I do know this... the King who killed my brother is a dead man walking. And I'm prepared to sacrifice my heart, body and soul to ensure I get my revenge.
