Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred. One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of

great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Originally published in 1985. In the last two decades education in the Third World has greatly expanded, raising many important issues. Some less developed countries have emulated the West in the style and organisation of their academic systems, hence, it could be said, increasing their dependence. Others have deliberately avoided this path, experimenting with systems more relevant to development and often in a radical way. At a theoretical level, Marxist and neo-Marxist development theorists argue that education systems dependent on the West are evidence of economic dependency and of the correctness of Marxist development theories; while others argue that the evidence points to an interdependent world and that dependency theories do not apply to education. Interestingly two key Marxist Third World Countries, China and Cuba, have very conservative education systems. This book discusses the problems of dependence and interdependence in education throughout the world.
