We revisit Lipset 's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing

overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

These accounts of shooting birds and hunting big game

mostly relate the author's adventures in North America--Canada and The United States. Game species encountered, or hoped to encounter, include mule deer, whitetail deer, blacktail deer, pronghorn antelope, elk, bear, turkey and geese. But by convenience, and necessity because all his hunts don't fit neatly into the confines of North America, and the author had no other place to tell a couple of unique hunt stories, this

volume also includes reports of dove hunting in Honduras and red stag in Spain. Mainly, this collection tells the story of one hunter who just happened to be a writer and whose job sometimes required him to go hunting, making him, if not a PH (professional hunter) then perhaps a PTPH (part-time) or a SPH (semi). Either way, for him it was a dream job.

Congress passed the Indian Removal Act in 1830 with the intent of moving five large tribes to Indian Territory. The tribes could either

move to the reservations or assimilate. As settlers kept moving west, more and more tribes were encountered, and all ultimately found themselves going to reservations. This new way of life was a vast change for the Indians.

The Eighth Annual Report .. Simon and Schuster

Violence is one of

the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues

---

as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international-and

intranational-level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as

the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence

---

and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

This book is the first to treat the

chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those - students and novices -- who begin to work and those who are working in this fascinating and challenging field of the heaviest and superheavy elements, for their lecturers, their advisers and for the practicing scientists in the

field - chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and

---

physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to

easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic. Superheavy elements - chemical elements which are much heavier than those which we know of from our daily life - are a persistent dream in human minds and the kernel of science fiction literature for about a century. *Nativity* Springer

in world politics and in security policies world over, oil and gas have tremendous value in both, the political and economical sectors of global relations, business establishments and policy. Regardless of whether one is a novice to a given field, or a well accomplished veteran in the field, there is a need for the continued engagement with the basics that

---

underlie the core subjects. With that in mind, the Fundamentals of Oil and Gas is a perfect primer for the first-timer in the field, while also a copious text to help a seasoned veteran stay abreast with the nuances of the world of Oil and Gas.

The two available are: - cyantraniliprole for insect control in headed brassicas - halauxifen-methyl +/- fluroxypyr for broad-leaved weed control in cereals. The five awaiting confirmation are: - buprofezin for

insect control in protected Solonaceae - penhoxamid for weed control in grain maize and winter oilseed rape - Pepino Mosaic Virus for suppression of viral diseases in protected tomatoes - Pythium oligandrun M1 for disease control in spring barley, wheat and oilseed rape - Tembotrione for weed control in maize and sweetcorn. In addition, hazard precautions have been

---

upgraded and the roll out of extended buffer zones, for some products, continues with many products re-approved under new MAPP numbers. There are also: - 7 new herbicide profiles - 4 in the main section and 3 as PARs - 8 new fungicide profiles - 6 in the main section and 2 as PARs - 1 new plant growth regulator (PGR) combination and 1 new molluscicide. In the main section of the Guide 8 herbicide profiles (tepraloxym dim approval expires 30/11/ 2016), 17 fungicides (including prochloraz), 4 insecticides and 1 PGR are no longer included.
