While interest in Paul's relationship to Judaism has been growing recently, this study adds an important aspect by comparing Paul's practical instruction with the ancient halakha or Jewish traditional law. First Corinthians is found to be a source of prime importance, and surprisingly, halakha appears to be basic to Paul's instruction for non-Jewish Christians. The book includes thorough discussion of hermeneutic and methodological implications, always viewed in relation to the history of Pauline and Judaic study. Attention is also being paid to the setting within Hellenistic culture. Finally, conclusions are drawn about the texture of Paul's thought and these are applied to two 'theological' passages decisive for his place in Judaism.

Historical and theological implications are vast, both regarding Paul's relationship to Judaism, his attitude towards Jesus and his Apostles, and the meaning of his teaching concerning justification and the Law.

The Byzantine Apocalyptic Tradition Taylor & Francis

Origen to Africanus, a beloved brother in God the Father, through Jesus Christ, His holy Child, greeting. Your letter, from which I learn what you think of the Susanna in the Book of Daniel, which is used in the Churches, although apparently somewhat short, presents in its few words many problems, each of which demands no common treatment, but such as oversteps the character of a letter, and reaches the limits of a discourse. And I, when I consider, as best I can, the measure of my intellect, that I may know myself, am aware that I am wanting in the accuracy necessary to reply to your letter; and that the more, that the few days I have spent in Nicomedia have been far from sufficient to send you an answer to all your demands and queries even after the fashion of the present epistle. Wherefore pardon my little ability, and the little time I had, and read this letter with all indulgence, supplying anything I may omit.

Testament of Judah A&C Black

This book offers a fresh, contemporary translation of Origen's 28 homilies on the book of Numbers.

*Jewish Traditions in Early Christian Literature, Volume 1 Paul and the Jewish Law* Brill Archive  
Scholars of early Christian and Jewish literature have for many years focused on interpreting texts in their hypothetical original forms and contexts,

while largely overlooking important aspects of the surviving manuscript evidence and the culture that produced it. This volume of essays seeks to remedy this situation by focusing on the material aspects of the manuscripts themselves and the fluidity of textual transmission in a manuscript culture. With an emphasis on method and looking at texts as they have been used and transmitted in manuscripts, this book discusses how we may deal with textual evidence that can often be described as mere snapshots of fluid textual traditions that have been intentionally adapted to fit ever-shifting contexts. The emphasis of the book is on the contexts and interests of users and producers of texts as they appear in our surviving manuscripts, rather than on original authors and their intentions, and the essays provide both important correctives to former textual interpretations, as well as new insights into the societies and individuals that copied and read the texts in the manuscripts that have actually been preserved to us.

The Book of Acts in Its Graeco-Roman Setting BRILL

Throughout Christian history, apocalyptic visions of the approaching end of time have provided a persistent and enigmatic theme for history and prophecy. Apocalyptic literature played a particularly important role in the medieval world, where legends of the Antichrist, Gog and Magog, and the Last Roman Emperor were widely circulated. Although scholars have long recognized that a body of Byzantine prophetic literature served as the source for these ideas, the Byzantine textual tradition, its sources, and the way in which it was transmitted to the West have never been thoroughly understood. For more than fifteen years prior to his death in 1977, Paul J. Alexander devoted his energies to the clarification of the Byzantine apocalyptic tradition. These studies, left uncompleted at his death, trace the development of a textual tradition that passed from Syriac through Greek to Slavonic and Latin literature. Using a combination of philological and historical detection, the author establishes the time, place, and circumstances of composition for each of the major surviving texts, identifying lost works known only through descriptions. In showing how Byzantine prophecy served as a bridge between ancient eschatological works and the medieval West, Alexander demonstrates that apocalyptic literature represents a creative source for the expression of political and religious thought in the medieval world. Interpreting the New Testament BRILL

Juxtaposing short stories, poetry, painting, and photographs, *Troubling Borders* showcases the creative work of women of Vietnamese, Cambodian, Lao, Thai, and Filipino ancestry. This thematically arranged collection interrupts borders of categorization and gender, in what preface author Shirley Geok-Lin Lim describes as a "leap over the barbed fences that have kept these women apart in these, our United States of America." The sixty-two contributors have been shaped by colonization, wars, globalization, and militarization. For some of these women on the margins of the margin, crafting and showing their work is a bold act in itself. Their provocative and accessible creations tell unique stories, provide sharp contrasts to familiar stereotypes--Southeast Asian women as exotic sex symbols, dragon ladies, prostitutes, or "bar girls"--and serve as entry points for broader discussions about questions of history, memory, and identity.

believed in Two Powers in Heaven, Alan Segal explores some relationships between rabbinic Judaism, Merkabah mysticism, and early Christianity. *Two Powers in Heaven* was a very early category of heresy. It was one of the basic categories by which the rabbis perceived the new phenomenon of Christianity and one of the central issues over which Judaism and Christianity separated. Segal reconstructs the development of the heresy through prudent dating of the stages of the rabbinic traditions. The basic heresy involved interpreting scripture to say that a principal angelic or hypostatic manifestation in heaven was equivalent to God. The earliest heretics believed in two complementary powers in heaven, while later heretics believed in two opposing powers in heaven. Segal stresses the importance of perceiving the relevance of rabbinic material for solving traditional problems of New Testament and gnostic scholarship, and at the same time maintains the necessity of reading those literatures for dating rabbinic material. Please note that *Two Powers in Heaven* was previously published by Brill in hardback, ISBN 90 04 05453 7 (no longer available).

"This new series is designed with the needs of introductory level students in mind. It will also appeal to general readers who want to be better informed about the latest advances in our understanding of the Bible and of the intellectual, political and religious world in which it was formed."

"The authors in this series bring to light the methods and insights of a whole range of disciplines - including archaeology, history, literary criticism and the social sciences - while also introducing fresh insights and approaches arising from their own research."--BOOK JACKET.

The Legend of Sergius Bah??i?„ra?„ Routledge  
This book was first published in 1982.

Unemployment is perhaps one of the most serious social problems. In economic terms the cost of unemployment, both to the individual and to the collective, is extremely high. But unemployment has other effects too. In this book Marie Jahoda looks beyond the obvious economic consequences, to explore the psychological meaning of employment and unemployment. The book is an accessible and nontechnical account of the contribution which social psychology can make to understanding unemployment and clearly reveals the limitations of an exclusive concentration on its economic aspects.

Professor Jahoda shows that the psychological impact is hugely destructive, throwing doubt on the popular diagnosis that the work ethic is disappearing. She also analyses the experience of unemployment in the context of the experience of employment and argues that one of the socially destructive consequences of large-scale unemployment is that it detracts from the need to humanise employment.
