Lotus introduced the Type 75 Elite in 1974. Being a full four-seater coupe with an opening glass tailgate, it was designed to carry a family in comfort while retaining Lotus' trademark, excellent road holding and handling. Perhaps most importantly, it was the first - and successful - step in Colin Chapman's plan to move upmarket and away from Lotus' kit car image. The Elite gave rise to two derivatives, the Eclat and the Excel. The Eclat was a restyled coupe version, sacrificing the Elite's unique rear styling and good rear passenger headroom for a more stylish exterior. With its conventional coupe styling, the Eclat was more mainstream than the Elite, and it was in the end the better seller. In turn, the Eclat spawned the Excel, the last of the Elite-

inspired family. Matthew Vale looks at the history of these unusual Lotus models, and gives a thorough guide to buying and owning the cars today. Of interest to all motoring enthusiasts and Lotus owners in particular, it includes information on buying and owning the cars today, specifications, owner's experiences and technical information. Superbly illustrated with 130 colour photographs, both period and contemporary.

From the popular Haynes Owners' Workshop Manual space series, which includes NASA Apollo 11 Manual and NASA Space Shuttle Manual, this unique book provides an insight into the only car ever built to be driven on the surface of another world. With a Foreword by the first Apollo astronaut to drive it on the Moon, Dave Scott, and published to coincide with the 40th anniversary of mankind's final drive on the Moon in December 2012. The book is part mechanical guide, illustrated with many of the technical drawings from the time, and part narrative-driven story of engineering ingenuity and human triumph. It draws on the rich NASA photographic archive and the complete transcripts of the crews' reaction to driving across the Moon, which the authors have an un-paralleled knowledge and experience of working with.

As everyone knows, there are three ways of doing things. The right way, the wrong way and the Top Gear way. Although, on reflection, that's usually just the wrong way, but faster and with more shouting. Anyway, the good news is that this third way of doing things can be applied to almost anything, and that includes motoring in general.

All you need is the right guidance, which is where the brand new Top Gear Alternative Highway Code comes in. Top Gear's Alternative Highway Code will show you how to bring the ambitious but rubbish philosophies of the world's most popular TV programme to your driving, containing advice on general motoring, as well as specific tips on how to deal with common eventualities like a rapidly sinking amphibious camper van, a caravan airship that's just crashed into a small bush, or a stupid home-made limousine that's snapped in half while transporting a top celebrity to an awards ceremony.

Road users should not leave home without it.
