From "one of the nation's foremost Chicano literary artists" comes a coming-of-age classic and the bestselling Chicano novel of all time that follows a young boy as he questions his faith and beliefs -- now one of PBS's "100 Great American Reads" (Denver Post). Antonio Marez is six years old when Ultima comes to stay with his family in New Mexico. She is a curandera, one who cures with herbs and magic. Under her wise wing, Tony will probe the family ties that bind and rend him, and he will discover himself in the magical secrets of the pagan past--a mythic legacy as palpable as the Catholicism of Latin America. And at each life turn there is Ultima, who delivered Tony into the world... and will nurture the birth of his soul.

"From one of the country's finest schools of medicine comes the most comprehensive, authoritative, and practical lay reference guide to the heart ever published. For the more than sixty-five million Americans affected by some form of cardiovascular disease and the millions of others concerned about their risk of heart disease, the Yale University School of Medicine Heart Book could well be a lifesaver, with indispensable information on the prevention, symptoms, diagnosis, and treatment of our number one killer disease." "Each of the twenty-nine chapters was written by a member of Yale's distinguished medical school faculty and staff. In clear, understandable language they provide answers such as how to recognize critical warning signs (and take preventive action) before a heart attack strikes, how to live a normal life after a heart attack, how to modify your diet to lower cholesterol and lose weight without destroying the pleasure of eating, and how to manage stress in today's

anxiety-ridden world." "There are special sections on tests and procedures as well as chapters on heart disease in women, the elderly, and children and young adults. A quick reference "Encyclopedia of Common Heart Disorders" provides at-a-glance descriptions of each medical problem, as well as its diagnosis, treatment, and prevention." "Also featured is a full-color atlas of the cardiovascular system and more than two hundred illustrations, charts, and tables. The Yale University School of Medicine Heart Book is truly the one reference guide every family needs to be fully informed about maintaining a healthy heart."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **Time: A to Z Health Guide** Metropolitan Books  
The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

Heartsaver First Aid Student Workbook (International English) Springer

School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger

hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

**INDICATIVE MOOD** Anchor Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a

medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities
