Barroux tackles ocean pollution in the stunning follow-up to the critically acclaimed *Where's the Elephant?* - recommended by *The Guardian*, *Sunday Times* and *The Sun*. Find the whale, the clownfish and the starfish on every page - until the piles of rubbish start to make it much too difficult. Both a *Where's Wally*-style spotting game and a striking work of art, this almost wordless tale puts the power back in the hands (or fins) of the natural world, with a boldly beautiful twist ending. With an insight and warmth comparable to *Frann Preston-Gannon's The Journey Home*, Barroux has created an astoundingly powerful

modern classic that promises to be remembered for generations to come. The perfect way to introduce the topic of the environment to boys and girls aged 3 and over. Barroux's books include *Uncle John and the Giant Cherry Tree*, which won him the 2005 *Enfantaisie Award*, and the extraordinary *Line of Fire, Diary of An Unknown Soldier* which has received widespread critical acclaim. In 2015 Barroux won the first *Parents, Babies, a Book* competition for his work *Chuut!* which will be given to every newborn baby in the north of France.

From the rivers and streams to the mighty ocean, God filled the Earth's waters with animals great and small. Upon His Word, enormous whales sprung into being. At His command, billions of plankton leapt to life. On that day, millions of creatures like the strapping sea turtles, the skulking sharks, the delightful dolphins, and the soaring squid gladly joined their fellow sea animals. How joyously crammed with excitement was the fifth day of earth's existence.

Apologia's newest elementary science book will take you and your family on an exploration into the wonders of the swimming creatures made on the fifth day of Creation. You'll begin with a big splash from the whales and dolphins, then spy on seals and meet manatees before swimming with the sea turtles, snakes, and salamanders. You'll even peek in on the primeval plesiosaurs and its pals. Following your frolic with fish and sharks, you'll uncover the world of crabby crustaceans, sea snails, clams, and their soft bodied friends like the octopus, squid, and nautilus. You'll consort with corals, find flowers that devour plankton, see stars and feathers that walk, leap and roll, and discover dollars that disappear in the sand and sponges that clean more than you might think. From the microscopic to massive, no stone is left unturned in your student's passage through the waters of the world. The creatures your student studies will come to life as your student creates replicas of them and adds them to his Ocean box - a miniature hand-crafted aquarium. As always, each lesson ends with an experiment or project reinforcing the scientific method and the

concepts studied. Among other experiments and projects, your student will try on blubber, investigate a shark's ability to sense electrical currents, explore how whales can hear sounds that come from far away, and learn through experimentation which creatures make the best fossils. No matter how near or far you live from the ocean, you and your students will wonder at God's design in the amazing aquatic animals He formed and fashioned on the fifth day. Slip on your scuba gear, and come explore with us!

A Pronouncing Dictionary of American English During the past 15 years, there has been remarkable progress in the analysis and manipulation of DNA and its use in nanotechnology. DNA analysis is ubiquitous in molecular biology, medical diagnostics, and forensics. Much of the readout technology is based on fluorescence detection. This volume contains contributions from many experts in the field who present an overview of many aspects of DNA technology. These chapters provide an understanding of the underlying principles and technology, rather than an exhaustive review of the literature. Written in a clear straightforward style, this book is an excellent introduction for any scientist to the use of fluorescence in DNA analysis. DNA Technology is an essential reading for all
