Can drinking coffee help people live longer? What makes a stock 's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You ' ll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it ' s figuring out what data you need, or understanding that the way you collect and

prepare data affects the conclusions you can draw from it, Why will help you sharpen your causal inference skills.

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation

that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research Weeding Cane Psychology Press

 Getting cancer is like a bomb going off in your life. Having chemotherapy can feel like another bomb. If you're getting ready for chemotherapy, you probably have many questions-but searching for answers on the internet can be overwhelming and the pamphlets from your oncologist don't begin to tell you all you need to know. You may be scared, confused or exhausted. You'll want to know what to expect and how to prepare for chemotherapy - and so will your loved ones who are supporting you. In her concise and easy-to-read guidebook, *Braving Chemo*, Harvard-educated physician and breast cancer survivor Beverly A. Zavaleta MD cuts through the confusion to provide you with clear answers to your most urgent chemotherapy questions.
 ¿ Can I keep my hair from falling out? ¿ What should I eat? ¿ How can I keep my spirits up when I'm worried about dying? Combining her medical expertise with a survivor's experience and insight, Dr. Zavaleta provides practical advice on topics such as where to find reliable information about your treatment regimen, what you should take to your chemo session,

and how to keep up your strength. Braving Chemo also confronts the challenges of cancer recovery and coping with fear of death. Whether you are a chemotherapy patient or a cancer caregiver, Braving Chemo is a valuable resource about what to expect during chemo, how to minimize the side effects, and how to live life as normally as possible when life itself is on the line.

' KUMBA AFRICA ', is a compilation of African Short Stories written as fiction by Sampson Ejiike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven ' t tested or felt the impact of civilization. These people still maintain their ancient traditions

and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

How record albums and their covers delivered mood music, lifestyle advice, global sounds, and travel tips to midcentury Americans who longed to be modern. The sleek hi-fi console in a well-appointed midcentury American living room might have had a stack of albums by musicians like Frank Sinatra, Elvis Presley, or Patti Page. It was just as

likely to have had a selection of LPs from slightly different genres, with such titles as *Cocktail Time*, *Music for a Chinese Dinner at Home*, *The Perfect Background Music for Your Home Movies*, *Honeymoon in Hawaii*, *Strings for a Space Age*, or *Cairo! The Music of Modern Egypt*. The brilliantly hued, full-color cover art might show an ideal listener, an ideal living room, an ideal tourist in an exotic landscape—or even an ideal space traveler. In *Designed for Hi-Fi Living*, Janet Borgerson and Jonathan Schroeder listen to and look at these vinyl LPs, scouring the cover art and the liner notes, and find that these albums offered a guide for aspirational Americans who yearned to be modern in postwar consumer culture. Borgerson and Schroeder examine the representations of modern life in a selection of midcentury record albums, discussing nearly 150 vintage album covers, reproduced in color—some featuring modern art or the work of famous designers and photographers. Offering a fascinating glimpse into the postwar imagination, the first part, “Home,” explores how the American home entered the frontlines of cold war debates and became an entertainment zone—a place to play music, mix drinks, and impress guests with displays of good taste. The second part, “Away,” considers albums featuring music, pictures, and tourist information that prepared Americans for the jet age as well as the space race.

It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship.

However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, “I don't know. Let's find out together.” In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally

presented in *Setting the Standard for Project Based Learning* and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together.
