Ecological literacy : educating our children for a ...

Ecological literacy is the ability to understand the natural systems that make life on earth possible. To be ecoliterate means understanding the principles of organization of ecological communities and using those principles for creating sustainable human communities. The term was coined by American educator David W. Orr and physicist Fritjof Capra in the 1990s- thereby a new value entered education; the "well-being of the earth". An ecologically literate society would be a sustainable ...
