Study biotic and abiotic Ecosystems presented in a way that makes it more accessible to students and easier to understand. Discover the difference between Producers, Consumers and Decomposers. Look at evolving populations, change in Ecosystems, Food Chains and Webs. Understand what and why we classify what is Photosynthesis and how the water cycle interacts with man to microorganisms. An ecosystem is a group of things that work and live together in an environment. Our resource provides ready-

to-use information and activities for remedial students using simplified language and vocabulary. Ready to use reading passages, student activities and color mini posters, our resource is effective for test prep, whole-class, small group and independent work. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Explore your environment with our Life Science 3-book BUNDLE. Students begin by studying the different kinds of Ecosystems. See how food chains work by creating your own food web. Look through a microscope at the tiny world of microorganisms. Next, delve deep into ecosystems with Classification & Adaptation. Classify animals by their kingdom all the way down to their species. Then, do a case study on the adaptations of the koala. Finally, take a look at the building blocks of life with Cells. Compare single-celled and multicellular organisms. Look at the big picture by seeing how cells become organisms. Each concept is paired with hands-on activities and experiments. Aligned to the Next Generation Science Standards and written to Bloom's Taxonomy and STEAM initiatives, additional crossword, word search, comprehension quiz and answer key are also included.

Ecosystems CABI Introduction to Ocean and Ecology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Oceans The oceans may well be earth's final frontier. These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored. Under the waves, a watery world of frail splendor, foreboding creatures, and sights beyond imagination awaits. The Ocean Book will teach you about giant squid and other "monsters" of the seas; centuries of ocean exploration; hydrothermal vents; the ingredients that make up the ocean; harnessing the oceans' energy; icebergs; coral reefs; ships, submarines, and other ocean vessels; the major ocean currents;

El Niño; whirlpools and hurricanes; harvesting the ocean's resources; whales, dolphins, fish, and other sea creatures. Learning about the oceans and their hidden contents can be exciting and rewarding. The abundance and diversity of life, the wealth of resources, and the simple mysteries there have intrigued explorers and scientists for centuries,. A better understanding of our oceans ensures careful conservation of their grandeur and beauty for future generations, and lead to a deeper respect for the delicate balance of life on planet Earth.

Semester 2: Ecology

Study the relationship between living organisms and our place in God's wondrous creation! Learn important words and concepts from different habitats around the world to mutual symbiosis as a product of the relational character of God. This is a powerful biology-

focused course specially designed for multi-age teaching. Students will: Study the intricate relationship between living organisms and our place in God's wondrous creation

Examine important words and concepts, from different habitats around the world to our stewardship of the world's resources

Gain insight into influential scientists and their work

More fully understand practical aspects of stewardship

Investigate ecological interactions and connections in creation

The Ecology Book encourages an understanding of a world designed, not as a series of random evolutionary accidents, but instead as a wondrous, well-designed system of life around the globe created to enrich and support its different features. Activities provide additional ways to make the learning experience

practical.
