‘ A valuable corrective to the fraying narrative of [African] failure. ’ Foreign Affairs Not so long ago, Africa was being described as the hopeless continent. Recently, though, talk has turned to Africa rising, with enthusiastic voices exclaiming the potential for economic

growth across many of its countries. What, then, is the truth behind Africa ’ s growth, or lack of it? In this provocative book, Morten Jerven fundamentally reframes the debate, challenging mainstream accounts of African economic history. Whilst for the past two decades experts have focused on explaining why there has been a ‘ chronic failure of growth ’ in Africa, Jerven shows that most African economies have been growing at a rapid pace since the mid nineties. In addition, African economies grew rapidly in the fifties, the sixties, and even into the seventies. Thus, African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s. The

result has been misguided analysis, and few practical lessons learned. This is an essential account of the real impact economic growth has had on Africa, and what it means for the continent ’ s future.

The start of the new millennium will be remembered for deadly climate-related disasters - the great floods in Thailand in 2011, Super Storm Sandy in the United States in 2012, and Typhoon Haiyan in the Philippines in 2013, to name a few. In 2014, 17.5 million people were displaced by climate-related disasters, ten times more than the 1.7 million displaced by geophysical hazards. What is causing the increase in natural disasters and

what effect does it have on the economy? Climate Change and Natural Disasters sends three messages: human-made factors exert a growing influence on climate-related disasters; because of the link to anthropogenic factors, there is a pressing need for climate mitigation; and prevention, including climate adaptation, ought not to be viewed as a cost to economic growth but as an investment. Ultimately, attention to climate-related disasters, arguably the most tangible manifestation of global warming, may help mobilize broader climate action. It can also be instrumental in transitioning to a path of low-carbon, green growth, improving disaster resilience, improving natural resource use, and caring for the urban environment. Vinod Thomas proposes that economic growth will become sustainable only if governments, political actors, and local communities combine natural disaster prevention and controlling climate change into national growth strategies. When considering all types of capital, particularly human capital, climate action can drive economic growth, rather than hinder it.
CTET Success Master Paper 1 for Class 1 to 5 for 2021 Exams Disha Publications
This is the first book to address and review the United Nations' Declaration on the Rights of Peasants and Other People Working in Rural Areas (UNDROP),

which was adopted by the United Nations General Assembly in December 2018. Food security and sustainable agri-food systems, responsible governance of natural resources, and human rights are among the key themes of the new millennium. The Declaration is the first internationally negotiated instrument bridging these issues, calling for a radical paradigm change in the agricultural sector while giving voice to peasants and rural workers, recognised as the drivers of more equitable and resilient food systems. The book unfolds the impact of the Declaration in the wider realm of law and policy making, especially concerning the new human rights standards related to access and control of natural resources and the governance of food systems. The chapters in the book touch on a broad array of topics, including women ' s rights, the role of and impact on indigenous peoples, food sovereignty, climate change, land tenure, and agrobiodiversity. Voices from outstanding scholars and practitioners are gathered together to inform and trigger a further debate on the negotiation process, the innovative and potentially disruptive contents, the relations with other fields of

law, and the practical scope of the Declaration. The volume concludes with a collection of case studies that provide concrete examples to help us understand the potential impacts of the Declaration at regional, national, and local levels. This book is the first comprehensive tool to navigate the Declaration and is designed for students, researchers, and practitioners in the fields of food and agriculture law, peasant, agrarian and rural studies, human rights and environmental law, and international development and cooperation.

The Butterfly Defect Arihant Publications India limited

This book contributes to a better understanding of entrepreneurship in transition economies. Current literature reflects the more traditional schools of thought on entrepreneurship, which are influenced by the Western perspective, and fail to fully address the scenario in transition economies. There is a broad consensus among academics, policy makers, and practitioners that a fundamental cause of difficulties

experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new, private businesses, and particularly SMEs. This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers, which were inherited from the old system, remain in place, thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment. The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects, as well as identify which current barriers and issues still need to be resolved. Themes include innovation performance, financing, venture capital, educational factors, and entrepreneurial learning.

Indian Economy Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 4th Edition Oswaal Books and Learning Private Limited

1. The OPSC General Studies I Preliminary Examination is a complete study guide 2. The book is divided into 8 main Sections 3. Solved Papers and 5 Crack Sets for practice 4. The Economy Compendium for IAS Prelims
General Studies Paper 1 & State PSC
Exams 3rd Edition Disha Publications
*The United Nations' Declaration on
Peasants' Rights* CRC Press
When it was published in 2008, Richard
Thaler and Cass Sunstein's *Nudge:
Improving Decisions about Health, Wealth,
and Happiness* quickly became one of the
most influential books in modern
economics and politics. Within a short
time, it had inspired whole government
departments in the US and UK, and others
as far afield as Singapore. One of the keys
to *Nudge's* success is Thaler and
Sunstein's ability to create a detailed and
persuasive case for their take on
economic decision-making. *Nudge* is not a
book packed with original findings or data;
instead it is a careful and systematic
synthesis of decades of research into
behavioral economics. The discipline
challenges much conventional economic
thought – which works on the basis that,
overall, humans make rational decisions –
by focusing instead on the 'irrational'
cognitive biases that affect our decision
making. These seemingly in-built biases
mean that certain kinds of economic
decision-making are predictably irrational.

Thaler and Sunstein prove themselves
experts at creating persuasive arguments
and dealing effectively with counter-
arguments. They conclude that if
governments understand these cognitive
biases, they can 'nudge' us into making
better decisions for ourselves. Entertaining
as well as smart, *Nudge* shows the full
range of reasoning skills that go into
making a persuasive argument.

Formalising employment is a desirable policy goal, but how it is done matters greatly, especially for women workers. Indeed, formalisation policies that do not recognise gendered realities and prevailing socio-economic conditions may be less effective and even counterproductive. This book examines the varying trajectories of formalisation and their impact on women workers in five developing countries in Asia and Africa: India, Thailand, South Africa, Ghana and Morocco. They range from low- to middle-income countries, which are integrated into global financial and goods markets to differing degrees and have varying labour market and macroeconomic conditions. The case studies, using macro and survey data as well as in-depth analysis of particular sectors, provide interesting and sometimes surprising insights. Despite some limited successes in providing social protection benefits to some informal workers, most formalisation policies have not really improved the working conditions of women workers. In many cases, that is because the policies are gender-blind and insensitive to the specific needs of women workers. The impact of formalisation policies on women in developing countries is relatively under-researched. This book provides new evidence that will be applicable across a wide range of developing country contexts and will be of interest to

policymakers, feminist economists and students of economics, labour, gender and development studies, public policy, politics and sociology.

Why Your Personal Data Counts and How Tracking it Can Change the World

The Economy Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 3rd Edition

This book constitutes the thoroughly refereed conference proceedings of the 9th International Conference on Web and Internet Economics, WINE 2013, held in Cambridge, MA, USA, in December 2013. The 36 revised full papers were carefully reviewed and selected from 150 submissions and cover research in theoretical computer science, artificial intelligence and microeconomics.

Resource Diplomacy Under Hegemony
Springer

The Butterfly Defect addresses the widening gap between the new systemic risks generated by globalization and their effective management. It shows how the dynamics of turbo-charged

globalization has the potential and power to destabilize our societies. Drawing on the latest insights from a wide variety of disciplines, Ian Goldin and Mike Mariathan provide practical guidance for how governments, businesses, and individuals can better manage globalization and risk. Goldin and Mariathan demonstrate that systemic risk issues are now endemic everywhere—in supply chains, pandemics, infrastructure, ecology and climate change, economics, and politics. Unless we address these concerns, they will lead to greater protectionism, xenophobia, nationalism, and, inevitably, deglobalization, rising inequality, conflict, and slower growth. The Butterfly Defect shows that mitigating uncertainty and risk in an interconnected world is an essential task for our future.

How Globalization Creates Systemic Risks, and What to Do about It Disha Publications

The remarkable performance of the Chinese economy in the last three decades has placed China at the

centre of the world stage. In 1993, China became a net importer of energy, although it was not until the early 2000s that the world began to pay more attention to China's energy needs and its potential impact on the world. With China's energy search occurring within a hegemonic global structure dominated by the United States, the US watches with interest as China enhances its ties with energy-rich states. The book examines this triangular relationship and questions whether the US and China are in competition regarding access to the energy of a third state, within the context of a potential power transition. It includes case studies on China's energy relationship with countries such as Canada, Australia, Saudi Arabia, Nigeria, Brazil, Kazakhstan, Iran, Sudan and Venezuela and aims to understand the way a rising power interacts with the existing leading power and the possible outcome of this competition. The analytical framework employed helps the reader to understand not only the nature and pattern of triangles among

US, China and the Resource Rich States under 'resource diplomacy', but also the salient features of US-China competition around the world. Making an impressive contribution to the literature in fields such as US-China relations, international relations, Chinese foreign policy and global energy geopolitics, this book will appeal to students and scholars of these subjects.

Transforming Economies and Policies for a Sustainable Future Disha Publications

In Hacking Happiness, futurist and contributing Mashable writer John C. Havens introduces you to your "quantified self"—your digital identity represented by gigabytes of data produced from tracking your activities on your smartphone and computer. Harvested by megacorporations such as Google, Facebook, and Amazon, Havens argues that companies gather this data because of its immense economic value, encouraging a culture of "sharing" as they hoard the information based on our lives for private monetary gain. But there's an alternative to this digital dystopia. Emerging technologies will help us reclaim this valuable data for ourselves, so we can directly profit from the insights linked to our quantified selves. At the same time, sensors in smartphones and wearable devices will help us track our emotions to improve our well-being based on the science of

positive psychology. Havens proposes that these trends will lead to new economic policies that redefine the meaning of “wealth,” allowing governments to create policy focused on purpose rather than productivity. An issues book highlighting the benefits of an examined life in the digital world, this timely work takes the trepidation out of the technological renaissance and illustrates how the fruits of the Information Age can improve our lives for a happier humanity.

Hacking Happiness Princeton University Press

This book revisits some of the persisting challenges of development of India, which remain unresolved even after twenty-five years of economic reforms and almost fifteen years of high growth rate. These

include defining purpose of development, inequality, labour, work, unemployment, agrarian distress and migration. The book questions the overemphasis on growth to the extent of neglecting basic issues of development. With a number of contributions re-imagining development and its political economy, the book discusses above mentioned issues in light of new data and more recent conceptions of the issues. The contributors of this volume are eminent researchers in their respective field. Presenting primary as well as secondary data, the book considers the latest advances and research and also addresses new challenges like the global reorganization of production and the consequences for labour and the world of work, along with skills question. World of work has received detailed investigation in this book. This is a timely addition in existing literature especially in context of pandemic and lockdown. Informality and un/employment question is addressed in this context. Relationship among poverty, inequality and growth is examined in light of newer understanding. Agrarian distress is looked in a broader context. A number of papers are examining migration question by expanding coverage of migration and

including labour mobility as apart of migration debate. The present crisis of migrant labour and absence of social security for these workers is also discussed. This book is primarily intended for those interested in recent advances on some of the basic aspects of development, like poverty, inequality, informality, word of work, migration and labour mobility. It is also useful for researchers, policy makers, journalists and civil society organizations working on these issues.
