A Political Economy of the Middle East Oswaal Books and Learning Private Limited

This anthology highlights the theoretical foundations as well as the various applications of Behavioural Law and Economics in European legal culture. By the same token, it fosters the dialogue between European and American Law and Economics scholars. The traditional neo-classical microeconomic theory explains human behaviour by using Rational Choice. According to this model, people tend to maximize the difference between expected utility and cost ("expected utility theory"). This theory includes three assumptions: (1) unbounded rationality, (2) unbounded self-interest, and (3) unbounded willpower. Behavioural Economics questions these assumptions and endeavours to render economic analysis more realistic by underpinning it with psychological insights. In recent years, the influence of Behavioural Economics on the Economic Analysis of Law has gained momentum. Behavioural Law and Economics generates a better theoretical understanding of legal phenomena and offers a multitude of applications in legislation and legal adjudication. This volume is testament to the growing and thriving Law and Economics movement in Europe. The European Law and Economics community has steadily grown and the yearly Law and Economics Conference at the law faculty of the University of Lucerne has successfully become a guiding star in the vast sky of Law and Economics.

Also, Latest Solved Paper is given to know the exact Trend and Pattern of the paper. Housed with ample number of questions for practice, it gives robust study material useful for CTET, UPTET, HTET, UTET, CGTET, and all other states TETs. TOC Solved Paper I & II 2021 (January), Solved Paper I 2019 (December), Solved Paper II 2019 (December), Solved Paper 2019 (July), Solved Paper 2018 (December), CHILD DEVELOPMENT & PEDAGOGY: Concept of Development and its Relationship with Learning, Principles of Child Development, Influence of Heredity and Environment, Socialisation Process, Piaget, Kohlberg and Vygotsky, Concept of Child-Centered and Progressive Education, Construct of Intelligence and Multi-Dimensional Intelligence, Language and Thought, Gender Issues in Social Construct, Individual Difference Among Learners, Evaluation of Learning, Evaluation of Achievement and Formation of Questions, Inclusive Education and Addressing Children from Diverse Backgrounds, Identifying and Addressing Disabled and Learning Disability Children, Identifying and Addressing the Talented, Creative and Specially Aabled Learners, Thinking and Learning in Children, Basic Process of Teaching and Learning, Child as a Problem-Solver and as a Scientific Investigator, Alternative Conceptions of Learning in Children, Cognition and Emotion, Motivation and Learning, National Curriculum Framework 2005, Practice Sets (1-5).

Mocktime Publication Zed Books Ltd.

When it was published in 2008, Richard Thaler and Cass Sunstein's *Nudge: Improving Decisions about Health, Wealth, and Happiness* quickly became one of the most influential books in modern economics and politics. Within a short time, it had inspired whole government departments in the US and UK, and others as far afield as Singapore. One of the keys to *Nudge*'s success is Thaler and Sunstein's ability to create a detailed and persuasive case for their take on economic decision-making. *Nudge* is not a book packed with original findings or data; instead it is a careful and systematic synthesis of decades of research into behavioral economics. The discipline challenges much conventional economic thought – which works on the basis that, overall, humans make rational decisions – by focusing instead on the 'irrational' cognitive biases that affect our decision making. These seemingly in-built biases mean that certain kinds of economic decision-making are predictably irrational. Thaler and Sunstein prove themselves experts at creating persuasive arguments and dealing effectively with counter-arguments. They conclude that if governments understand these cognitive biases, they can 'nudge' us into making better decisions for ourselves. Entertaining as well as smart, *Nudge* shows the full range of reasoning skills that go into making a persuasive argument.

Resource Diplomacy Under Hegemony Disha Publications

This is the first book to address and review the United Nations' Declaration on the

Rights of Peasants and Other People Working in Rural Areas (UNDROP), which was adopted by the United Nations General Assembly in December 2018. Food security and sustainable agri-food systems, responsible governance of natural resources, and human rights are among the key themes of the new millennium. The Declaration is the first internationally negotiated instrument bridging these issues, calling for a radical paradigm change in the agricultural sector while giving voice to peasants and rural workers, recognised as the drivers of more equitable and resilient food systems. The book unfolds the impact of the Declaration in the wider realm of law and policy making, especially concerning the new human rights standards related to access and control of natural resources and the governance of food systems. The chapters in the book touch on a broad array of topics, including women's rights, the role of and impact on indigenous peoples, food sovereignty, climate change, land tenure, and agrobiodiversity. Voices from outstanding scholars and practitioners are gathered together to inform and trigger a further debate on the negotiation process, the innovative and potentially disruptive contents, the relations with other fields of law, and the practical scope of the Declaration. The volume concludes with a collection of case studies that provide concrete examples to help us understand the potential impacts of the Declaration at regional, national, and local levels. This book is the first comprehensive tool to navigate the Declaration and is designed for students, researchers, and practitioners in the fields of food and agriculture law, peasant, agrarian and rural studies, human rights and environmental law, and international development and cooperation.

Ecology & Environment Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 3rd Edition by Mocktime Publication

Finance is the evil we cannot live without. It governs almost every aspect of our lives and has the power to liberate as well as enslave. With the world's total financial assets--valued at a staggering \$300 trillion--being four times larger than the combined output of all the world's economies, there is, apparently, plenty to go around. Yet, while proponents of finance-driven capitalism point to the trickle-down effect as its contribution to wealth redistribution, there are still nearly a billion people across the globe existing on less than \$2 a day; 14 percent of Americans are living below the official poverty line; and disparities in wealth equality everywhere have reached unprecedented levels. Evidently a trickle is not enough. How can this be when so much wealth abounds, and when finance is supposedly chastened and reformed after its latest global crisis? How, especially, can it be in an age when human rights are more loudly proclaimed than ever before? Can the financial sector be made to shoulder more of the burden of spreading wealth, reducing poverty, and protecting rights? And if so, what role can human rights play in making it happen? In answering these questions, David Kinley draws on a vast array of material from bankers, economists, lawyers, and politicians, as well as human rights activists, philosophers, historians and anthropologists, alongside his own experiences working in the field. *Necessary Evil* shows how finance can shed its conceit, return to its role as the economy's servant not its master, and regain the public trust and credibility it has so spectacularly lost over the past decade--all by helping human rights, not harming them.

NTA UGC NET Paper 1 Topic-wise 52 Solved Papers (2020 to 2004) 2nd Edition Springer

The remarkable performance of the Chinese economy in the last three decades has placed China at the centre of the world stage. In 1993, China became a net importer of energy, although it was not until the early 2000s that the world began to pay more attention to China's energy needs and its potential impact on the world. With China's energy search occurring within a hegemonic global structure dominated by the United States, the US watches with interest as China enhances its ties with energy-rich states. The book examines this triangular relationship and questions whether the US and China are in competition regarding access to the energy of a third state, within the context of a potential power transition. It includes case studies on China's energy relationship with countries such as Canada, Australia, Saudi Arabia, Nigeria, Brazil, Kazakhstan, Iran, Sudan and Venezuela and aims to understand the way a rising power interacts with the existing leading power and the possible outcome of this competition. The analytical framework employed helps the reader to understand not only the nature and pattern of triangles among US, China and the Resource Rich States under 'resource diplomacy', but also the salient features of US-China competition around the world. Making an impressive contribution to the literature in fields such as US-China relations, international relations, Chinese foreign policy and global energy geopolitics, this book will appeal to students and scholars of these subjects.

(Free Sample) NTA UGC NET Paper 1 Topic-wise 52 Solved Papers (2020 to 2004) 2nd Edition Penguin

The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9781351527927>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. The start of the new millennium will be remembered for deadly climate-related disasters - the great floods in Thailand in 2011, Super Storm Sandy in the United States in 2012, and Typhoon Haiyan in the Philippines in 2013, to name a few. In 2014, 17.5 million people were displaced by climate-related disasters, ten times more than the 1.7 million displaced by geophysical hazards. What is causing the increase in natural disasters and what effect does it have on the economy? Climate Change and Natural Disasters sends three messages: human-made factors exert a growing influence on climate-related disasters; because of the link to anthropogenic factors, there is a pressing need for climate mitigation; and prevention, including climate adaptation, ought not to be viewed as a cost to economic growth but as an investment. Ultimately, attention to climate-related disasters, arguably the most tangible manifestation of global warming, may help mobilize broader climate action. It can also be instrumental in transitioning to a path of low-carbon, green growth, improving disaster resilience, improving natural resource use, and caring for the urban environment. Vinod Thomas proposes that economic growth will become sustainable only if governments, political actors, and local communities combine

natural disaster prevention and controlling climate change into national growth strategies. When considering all types of capital, particularly human capital, climate action can drive economic growth, rather than hinder it.

A Guide to Understanding and Using Business Models Routledge

This Third edition for Cambridge International AS and A Level Economics syllabus (9708) is thoroughly updated for first examination from 2016. Written by experienced authors in an engaging and accessible style, this Coursebook provides comprehensive coverage of the syllabus and rigorous and relevant content for AS and A Level Economics students. Included in this book is a free student CD-ROM containing revision aids, further questions and activities. A Teacher's CD-ROM is also available.

Issues, Obstacles and Perspectives Routledge

This book contributes to a better understanding of entrepreneurship in transition economies. Current literature reflects the more traditional schools of thought on entrepreneurship, which are influenced by the Western perspective, and fail to fully address the scenario in transition economies. There is a broad consensus among academics, policy makers, and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new, private businesses, and particularly SMEs. This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers, which were inherited from the old system, remain in place, thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment. The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects, as well as identify which current barriers and issues still need to be resolved.

Themes include innovation performance, financing, venture capital, educational factors, and entrepreneurial learning.

Economic Development and Entrepreneurship in Transition Economies MV-Verlag

The Indian Polity & Governance Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 3rd Edition Disha Publications

Formalising employment is a desirable policy goal, but how it is done matters greatly, especially for women workers. Indeed, formalisation policies that do not recognise gendered realities and prevailing socio-economic conditions may be less effective and even counterproductive. This book examines the varying trajectories of formalisation and their impact on women workers in five developing countries in Asia and Africa: India, Thailand, South Africa, Ghana and Morocco. They range from low- to middle-income countries, which are integrated into global financial and goods markets to differing degrees and have varying labour market and macroeconomic conditions. The case studies, using macro and survey data as well as in-depth analysis of particular sectors, provide interesting and sometimes surprising insights. Despite some limited successes in providing social protection benefits to some informal workers, most formalisation policies have not really improved the working conditions of women workers. In many cases, that is because the policies are gender-blind and insensitive to the specific needs of women workers. The impact of formalisation policies on women in developing countries is relatively under-researched. This book provides new evidence that will be applicable across a wide range of developing country contexts and will be of interest to policymakers, feminist economists and students of economics, labour, gender and development studies, public policy, politics and sociology.

Necessary Evil Business Expert Press

The book "Ultimate Guide for FCI Assistant Grade - III Recruitment Exam Paper 1 & 2" has been written exclusively for the vacancies of General, Depot, Technical and Accounts cadre.
