Economics, European edition Pearson Canada

Age at Work explores the myriad ways in which 'age' is at 'work' across society, organizations and workplaces, with special focus on organizations, their boundaries, and marginalizing processes around age and ageism in and across these spaces. The book examines: how society operates in and through age, and how this informs

the very existence of organizations; age-organization regimes, age-organization boundaries, and the relationship between organizations and death, and post-death the importance of memory, forgetting and remembering in re-thinking the authors' and others' earlier work tensions between seeing age in terms of later life and seeing age as pervasive social relations. Enriched with insights from the authors' lived experiences, *Age at Work* is a major and timely intervention in studies of age, work, care and organizations. Ideal for students of Sociology, Organizations and Management, Social Policy, Gerontology, Health and Social Care, and Social Work. Macroeconomics UUM Press

Essential Economics Pearson Education

Mainstream textbooks present economics as an objective science, free from value judgements. The *Microeconomics Anti-Textbook* demonstrates this to be a myth – one which serves to make such textbooks not only off-puttingly bland, but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors

Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way, before presenting an 'anti-text' analysis and critique. Challenging the assumptions, arguments, and models, Hill and Myatt provide the essential guide to decoding the textbooks, and show that real economics is far more interesting – and subversive – than the simplistic version presented to students.

Macroeconomics McGraw-Hill Higher Education

Economics 4th edition is a concise introduction to the core principles of economics, aimed at students taking their first, and probably only, one semester course in Economics. These students may be taking a business related degree, or may be from other degree schemes in the university taking a service course in Introductory Economics. There is a balanced split between the micro and macro economics section and the use of case studies and numerous examples makes this a lively little book for the reader. The real difference that this book offers the student is the amount and variety of questioning material that will really test their understanding.

"Thoroughly updated, this revision builds on the solid foundation of the previous edition and retains its thorough and detailed presentation of the principles of economics, its emphasis on real-world examples and applications, its development of critical thinking skills, its diagrams renowned for pedagogy and precision, and its path-breaking technology. Most chapters have been thoroughly reworked to achieve even greater clarity and to place greater emphasis on applications to current issues. Some sections of chapters have been removed and other sections

added to cover new issues, particularly those that involve current policy problems. Current issues organise each chapter. News stories about today's major economic events tie each chapter together, from new abbreviated chapter-opening vignettes to Economics in the News and end-of-chapter problems and applications and online practice. Economics in the News boxes show students how to use the economic toolkit to understand the events and issues they are confronted with in the media. At Issue boxes show two sides of a controversial issue and helps students to apply the economic way of thinking to clarify and debate the issues. Among the many issues covered in one or more of the features described above are: Capitalism and its critics in Chapter 1 The supply elasticity of face masks in Chapter 4 Toilet paper price gouging in Chapter 5 The expansion of video streaming in Chapter 8 Climate change and wind power in Chapters 2 and 16 Brexit and Covid effects on UK growth in Chapter 26 Inflation risk in the EU in Chapter 28 Fiscal stimulus in Chapter 29 The Bank of England's extraordinary actions in Chapter 30 Extraordinary monetary stimulus in Chapter 30"--
