As we rebuild our lives in the wake of Covid-19 and face the challenges of ecological disaster, how can the left win a world fit for life? Planet on Fire is an urgent manifesto for a fundamental reimagining of the global economy. It offers a clear and practical road map for a future that is democratic and sustainable by design. Laurie Laybourn-Langton and Mathew Lawrence argue that it is not enough merely to spend our way out of the crisis; we must also rapidly reshape the economy to create a new way of life that can foster a healthy and flourishing environment for all. Planet on Fire offers a detailed and achievable manifesto for a new politics capable of tackling environmental breakdown.

This open access book is the first published guide about how to analyse data produced by the EQ-5D, one of the most widely used Patient Reported Outcomes questionnaires world wide. The authors provide practical, clear and comprehensive guidance in five concise chapters. Following an overview of the EQ-5D and its analysis, we describe how the questionnaire data – the EQ-5D profile and EQ VAS – can be analysed in different ways to generate important insights into peoples' health. We then show how the value sets which accompany the EQ-5D can be applied to summarise patients' data. The final chapter deals with advanced topics, including the use of Minimally Important Differences, case-mix adjustment, mapping, and more. This book is essential for those new to analyzing EQ-5D data and will be also be valuable for those with more experience. The methods can be applied to any EQ-5D instrument (for example, the three- and five-level and Youth versions) and many of the methods described will be equally relevant to other Patient Reported Outcomes instruments.

Mainstream textbooks present economics as an objective science, free from value judgements. The Microeconomics Anti-Textbook demonstrates this to be a myth – one which serves to make such textbooks not only off-puttingly bland, but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way, before

presenting an 'anti-text' analysis and critique. Challenging the assumptions, arguments, and models, Hill and Myatt provide the essential guide to decoding the textbooks, and show that real economics is far more interesting - and subversive - than the simplistic version presented to students.

For courses in microeconomics. Significantly revised and updated with new real-world examples, exercises, and applications, this edition remains the premiere microeconomics text to marry formal theory with robust, thoroughly analysed real-world problems. Intended as an intermediate microeconomics text, Perloff introduces economic theory through a combination of calculus, algebra, and graphs. The text integrates estimated, real-world problems and applications, using a step-by-step approach to demonstrate how microeconomic theory can be applied to solve practical problems and policy issues. Compared to other similar texts, the author also places greater emphasis on using contemporary theories—such as game theory and contract theory—to analyse markets. Age at Work explores the myriad ways in which 'age' is at 'work' across society, organizations and workplaces, with special focus on organizations, their boundaries, and marginalizing processes around age and ageism in and across these spaces. The book examines: How society operates in and through age, and how this informs the very existence of organizations Age-organization regimes, age-organization boundaries, and the relationship between organizations and death, and post-death The importance of memory, forgetting and remembering in re-thinking the authors' and others' earlier work Tensions between seeing age in terms of later life and seeing age as pervasive social relations. Enriched with insights from the authors' lived experiences, Age at Work is a major and timely intervention in studies of age, work, care and organizations. Ideal for students of Sociology, Organizations and Management, Social Policy, Gerontology, Health and Social Care, and Social Work.

"Thoroughly updated, this revision builds on the solid foundation of the previous edition and retains its thorough and detailed presentation of the principles of economics, its emphasis on real-world examples and applications, its development of critical thinking skills, its diagrams renowned for pedagogy and precision, and its path-breaking technology. Most chapters have been thoroughly reworked to achieve even greater clarity and to place greater emphasis on applications to current issues. Some sections of chapters have been removed and other sections added to cover new issues, particularly those that involve current policy problems. Current issues organise each chapter. News stories about today's major economic events tie each chapter together, from new abbreviated chapter-opening vignettes to *Economics in the News* and end-of-chapter problems and applications and online practice. *Economics in the News* boxes show students how to use the economic toolkit to understand the events and issues they are confronted with in the media. At Issue boxes show two sides of a controversial issue and helps students to apply the economic way of thinking to clarify and debate the issues. Among the many issues covered in one or more of the features described above are: Capitalism and its critics in Chapter 1 The supply elasticity of face masks in Chapter 4 Toilet paper price gouging in Chapter 5 The expansion of video streaming in Chapter 8 Climate change and wind power in Chapters 2 and 16 Brexit and Covid effects on UK growth in Chapter 26 Inflation risk in the EU in Chapter 28 Fiscal stimulus in Chapter 29 The Bank of England's extraordinary actions in Chapter 30 Extraordinary monetary stimulus in Chapter 30"--
