The major goals of this revision have been to streamline the text and to present more student oriented examples. We are also providing a new design with enhanced four colour graphics. Much fine tuning and trimming has gone into almost every chapter resulting in a more approachable textbook for your students. Several chapters that are rarely used will now appear on the book's website. The 9th edition will be much better integrated with the book's website where students can get additional information and/or current events associated with many major topics in the text. Also, the website will have "Want to see the Math Notes" for those instructors that choose a more sophisticated math treatment of the major topics in both Micro and Macro. Another commitment to Instructor Support will be the annual updating of time sensitive PowerPoint slides.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

The epic story of how one man shaped events, people, and himself to forever change a country. President Theodore Roosevelt forever transformed America, ushering the country into the arena of world supremacy. His brand of leadership is entirely American: confident, compassionate, energetic, diverse, visionary. But Roosevelt was not a born leader; his ascent to the apex of power was not a foregone conclusion. He made himself a leader of consequence and it is his epic journey to the White House—a road filled with terrific failures, intimate introspection, and self-made luck—will inspire readers anew. While a graduate student at Harvard, author Jon Knokey, a Roosevelt historian and business leader, unearthed hundreds of unpublished letters and interview notes from Roosevelt contemporaries. These long-forgotten documents provide a fresh and stunning ringside seat along the 26th President's journey to 1600 Pennsylvania Avenue. The stories from Harvard chaps, idealistic political reformers, coarse cowboys from the Badlands, and rough and tumble Rough Riders from the nation's interior, all combine to illuminate the maturation process of a man learning to lead at every stage of his life. Fast paced and written as a biographical narrative, Theodore Roosevelt and the Making of American Leadership places the reader alongside a young Theodore Roosevelt as he learns what he stands for and how he will lead. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.
