The 9th edition of Lind/Marchal/Wathen: Basic Statistics for Business and Economics, is a step-by-step approach that enhances student performance, accelerates preparedness and improves motivation for the student taking a business statistics course. The main objective of the text is to provide students majoring in all fields of business administration with an

introductory survey of the many applications of descriptive and inferential statistics. The relevant approach taken in this text relates to the college students today as they will receive the information that is important to them in this class as well as their future careers. Understanding the concepts, seeing and doing plenty of examples and exercises, and comprehending the application of statistical methods in business and economics are the focus of this book. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Economics Gardner Press Schiller's Essentials of Economics is the market leader for the one-semester survey course, praised for its strong policy focus and core theme of seeking the best possible answers to the basic questions of WHAT, HOW, and FOR WHOM to produce. The 9th edition is benefitted by SmartBook, the first adaptive reading experience designed to engage students with the content in an active and

dynamic way, as opposed to the passive and linear reading experience they are used to. As a result, students are more likely to master and retain important concepts in the survey course. As in previous editions, students are confronted early on with the reality that the economy doesn't always operate optimally, either at the macro or micro level, and are encouraged to examine the policy challenge of finding the appropriate mix of market reliance and government regulation that generates the best possible outcomes. In addition to the suite of resources available within Connect Economics, over 100 key topics are reinforced with interesting and innovative videos on YouTube, provided to help non-majors see the relevance of economics. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Labor Economics, 5e is a well-received text that blends

coverage of traditional topics with modern theory and developments into a superb Labor Economics book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the Labor Economics field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester-long class. Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end-of-chapter material, and even stronger instructor support, the Fifth Edition of Labor Economics remains one of the most relevant textbooks in the market.

Loose Leaf for Management: A Practical, Problem-Solving Approach Irwin/McGraw-Hill
"This book is designed for a one-semester issues-based general education economics course, and its purpose is to interest the nonbusiness, noneconomics major in what the discipline of economics can do. Students of the "issues approach" will master the basic economic theory necessary to explore a variety of real-world issues. If this is the only economics course they ever take, they will at least gain

enough insight to be able to intelligently discuss the way economic theory applies to important issues in the world today. Until the first edition of this book was published, instructors who chose the issues approach to teaching a one-semester general economics course had to compromise in one of the following ways: they could (1) pick a book that presents the issues but that is devoid of economic theory; (2) pick a book that intertwines the issues with the theory; (3) ask students to buy two books; or (4) place a large number of readings on library reserve"--

This ninth edition of *Managerial Economics and Business Strategy* has been revised to include updated examples and problems, but it retains all of the basic content that made previous editions a success. By teaching managers the practical utility of basic economic tools such as present value analysis, supply and demand, regression, indifference curves, isoquants, production costs, and the basic models of perfect competition, monopoly, and monopolistic competition. This edition retains the emphasis on real-world examples and modern topics along with unique coverage found nowhere else: oligopoly, penetration pricing, multistage and repeated games, foreclosure, contracting, vertical and horizontal integration, networks, bargaining, predatory pricing, principal-agent problems, raising rivals' costs, adverse selection, auctions, screening and signaling, search, limit pricing, and a host of other pricing strategies for firms enjoying market power. This balanced coverage of traditional and modern microeconomic tools makes it appropriate for a wide variety of managerial economics classrooms.

Intimate Relationships, 3rd edition, by Sharon S. Brehm, Rowland S. Miller, Daniel Perlman, and Susan Campbell preserves the personal appeal of the subject matter and vigorous standards of scholarship that made the earlier editions so successful. Written in a unified voice, this text builds on the reader-friendly tone that was established in the first two editions. It presents the key findings on intimate relationships, the major theoretical perspectives, and some of the current controversies in the field.

Brehm, Miller, Perlman, and Campbell illustrate the relevance of close relationship science to readers' everyday lives, encouraging thought and analysis. Classic contributions to the field are covered in addition to topics on the leading edge of research.
