STATISTICS FOR ECONOMICS Elsevier

High quality, engaging content for students...ultimate flexibility for educators The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content – your way. Economics 7th edition provides a streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. By leaving the more technical content and application until later, students can enjoy the more exciting policy material from the beginning and engage with the content early. Through compelling examples, clear explanations and the latest instructive on-line resources, the text draws students into the content and reinforces learning through practice and solving problems which are relevant to them. The authors train students to think about issues in the way real economists do, and learn how to explore difficult policy problems and make more informed decisions by offering a clear introduction to theory and applying the concepts to today ' s events, news, and research.

ECONOMIC DEVELOPMENT Pearson Higher Education AU

Is economic efficiency a sound basis upon which to make public policy or legal decisions? In this sophisticated analysis, Richard S. Markovits considers the way in which scholars and public decision-makers define, predict, and assess the moral and legal relevance of economic efficiency. The author begins by identifying imperfections in the traditional definition of economic efficiency. He then develops and illustrates an appropriate response to Second-Best Theory and investigates the moral and legal relevance of economic-efficiency analyses. Not only do virtually all economic, legal, and public policy thinkers misdefine economic efficiency, the author concludes, they also ignore or respond inadequately to Second-Best Theory when analyzing the economic efficiency of public choices and misassess the relevance of economic-efficiency conclusions both for moral evaluations and for the answer to legal-rights questions that is correct as a matter of law.

Macroeconomics Cengage Learning

This textbook covers the full range of topics and issues normally included in a course on economic growth and development. Both mainstream economic perspectives as well as the multi-paradigmatic, inter-disciplinary, and dynamic-evolutionary perspectives from heterodox economics are detailed.

Economic development is viewed in terms of the long-run well-being of humanity, social stability, environmental sustainability, and just distribution of economic gains, not simply as the growth of GDP. Furthermore, this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments. The textbook's unique feature is its focus on the natural environment. Both the historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies. In fact, because economic development is defined in terms of economic, social, and environmental sustainability, the natural environment is included in discussions throughout the book. The textbook is inter-disciplinary: knowledge from fields such as sociology, psychology, political science, economic history, and ecology is called on to enhance the economic analysis. A thorough historical account of the development of the principal paradigms of economic development is also included, and the important issues of institutional development and cultural change merit their own chapters. Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic, social, and ecological systems. Also, the important relationship between economic development and globalization is presented in three chapters on international trade, international finance and investment, and immigration from both orthodox and heterodox perspectives.
