**Public Problems - Private Solutions?** HSRC  
Press

This 2015 OECD Economic Survey of South Africa examines recent economic developments, policies and prospects. Special chapters cover infrastructure and business regulation; tax policy and inclusive growth.

**Mastering Import and Export Management** Oxford University  
Press

From the internationally bestselling author and prizewinning economist--a highly original guide to the global economy. In his bestselling *23 Things They Don't Tell You About Capitalism*, Cambridge

economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works--in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range

---

of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics. From the future of the Euro, inequality in China, or the condition of the American manufacturing

industry here in the United States—Economics: The User's Guide is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

**The Changing Space Economy of City-Regions** John Benjamins Publishing  
**Locating the South African challenges within a broader international perspective, this study covers all the major economic growth challenges from employment, industrial policy, urban governance, and the informal economy to the social challenges of poverty, inequality, HIV/AIDS, and health policy. The**

---

key development debates of the post-apartheid era are outlined and the success of a decade of reform and experimentation is considered by a wide range of international development specialists, including American economists Gil Hart and Michael Carter; British economist Jonathan Michie; and South African Scholars Alan Whitesides, Julian May, and Mike Morris.

OECD Publishing

This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global

overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality

---

changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

HSRC Press

City councils have become increasingly aware of the potential for information technologies (ICTs) to improve the management of cities and as an instrument for economic and social policy. By comparing eight cities, this book examines a range of innovative urban e-governance strategies and develops a framework of analysis that permits a common approach.

### **Multilingual Glossary of Economics Terms.**

Study & master economic and management sciences grade 8 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

### **Politics and Governance of Basic Education** Springer Nature

This book investigates how global value chain governance, public institutions and strategies in the area of industrial policy and industrial

---

relations by stakeholders such as national or global trade unions, governments, companies or international NGOs shape upgrading in the Global South. A special feature is its interdisciplinarity, combining sociological, economic, legal and political dimensions. Case studies systematically compare different industry trajectories. Furthermore, it encompasses far-reaching insights into the role of global value chains for development, economic catching-up of countries and socio-political aspects such as working conditions and interest representation.

**Drum** Cambridge University Press  
A Century of Geography at  
Stellenbosch University 1920-2020  
focuses on the establishment and  
development of geography as an  
academic discipline at Stellenbosch,  
South Africa's founding geography

department. The ways in which the department currently operates are deemed fundamentally joined to its past and pave the way for the evolution of geography and its various subdisciplines going forward. The investigation seeks to highlight the development of the discipline and its institutionalisation as part of the academic offerings of the university, while providing details about the teaching and research conducted, as well as of the people who contributed to these endeavours. It also furnishes the academic geography community at Stellenbosch, and geography more broadly, with some insights into its past development and more recent changes, along with a complete bibliography of

---

conducted research.

X-kit FET Grade 12 ECONOMICS

HSRC Press

In a sweeping survey of African economies, leading scholars offer the latest research into the biggest current influences on African growth and development, taking account of relevant institutional contexts as well as significant or unique problems that have slowed Africa's progress.

Routledge

Urban Peacebuilding in Divided Societies explores the effects of urban policy and planning in the management of ethnic conflict in strife-torn societies, focusing on the cases of Belfast and

Johannesburg. It combines perspectives from urban geography, political science, social psychology, and urban planning to study the relationship between ethnic ideologies and the urban strategies that affect ethnic territoriality in the form of urban land use, housing, economic development, services, and citizen involvement. The book contrasts Belfast, embedded within an uncertain shift from conflict to political settlement, with Johannesburg, engaged in post-resolution reconciliation, to analyze, along different points of societal transition, the contributions of urban policymaking to peacemaking and peacebuilding. It describes the differing roles obstructive or facilitative that

---

contested cities can play amidst broader peacemaking efforts, consistent with Bollens contention that there are lessons in urban peacebuilding for constructing mutually tolerable living environments at the regional and national levels. Effectively, cities (and urban policies) are the locus for operationalizing national ideologies of ethnic coexistence. } Urban Peacebuilding in Divided Societies explores the effects of urban policy and planning in the management of ethnic conflict in strife-torn societies, focusing on the cases of Belfast and Johannesburg. *Urban Peacebuilding In Divided Societies*  
HSRC Press

South Africa has a severe HIV/AIDS epidemic. About 5.6 million South Africans, the majority of whom are in the economically active age group, are currently living with the virus.

Studies have been conducted to examine the impact of HIV/AIDS on various sectors of the economy, including mining, manufacturing, health and education. The effectiveness and functioning of the public sector is also

increasingly threatened by the HIV/AIDS epidemic. The education sector is thought to be particularly affected by HIV/ AIDS because both the demand for and supply of educators are affected. Not only do children drop out of school because of HIV/AIDS, thus reducing

---

demand for educators, but educators, school managers and education policy-makers are said to be dying of AIDS, thus reducing supply.

FCS Integrated English First Additional Language L4 Pearson South Africa

While South Africa has made significant improvements in basic and tertiary education enrollment, the country still suffers from significant challenges in the quality of educational achievement by almost any international metric. The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms. The main explanatory factors are

complex and multifaceted, and are associated with insufficient subject knowledge of some teachers, history, race, language, geographic location, and socio-economic status. Low educational achievement contributes to low productivity growth, and high levels of poverty, unemployment, and inequality. Drawing on the literature, the paper sketches some policy considerations to guide the debate on what works and what does not.

free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning.

*Economic and Management Sciences, Grade 8 JHU Press*

Argues that the interaction of formal institutions and the quality of democracy explain patterns of private sector development across Africa.
