The education of young people is context bound. This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.

Macroeconomics in Context Copyright Office, Library of Congress Principles of Agricultural Economics, now in its second edition, showcases the power of economic principles to explain and predict issues and current events in the food, agricultural, agribusiness, international trade, natural resource and other sectors. The field of agricultural economics has expanded to include a wide range of important and interesting topics, including macroeconomics, international trade, agribusiness, environmental economics, natural resources, and international development. For this new edition, the text has been updated throughout with a new chapter on policy, separate chapters for supply and demand, and increased coverage of key topics and approaches including finance, trade and behavioural economics. Readers will also benefit from an expanded range of case studies which demonstrate real world examples of the principles under discussion. These include obesity, alternative fuels, trade disputes, and animal welfare. The companion website provides students and instructors with extra material in order to enhance their learning and further their understanding of agricultural economics. This book introduces economic principles in a succinct and reader-friendly format, providing students and instructors with a clear, up-to-date, and straightforward approach to learning how a market-based economy functions, and how to use simple economic principles for improved decision making. The principles are applied to timely, interesting, and important real-world issues through words, graphs, and simple algebra. This book is for students who study agricultural economics, microeconomics, rural development and environmental policy.

Otto E. Miller, Plaintiff-Respondent, Against Fred W. Smythe, Defendant-Appellant Peterson's Social Science Tests and Reviews, consisting of the social science sections of the first seven MMYs and Tests in Print II, includes 166 original test reviews written by 72 specialists, five excerpted test reviews, 71 references on the construction, use, and validity of specific tests, a bibliography on in-print social science tests, references for specific tests, cumulative name indexes for specific tests with references, a publishers directory, title index, name index, and a scanning index. The 85 tests covered fall into the following categories: 22 general; 5 contemporary affairs; 10 economics; 7 geography; 24 history; 13 political science; and 4 sociology.

Bachelor Thesis from the year 2010 in the subject Education - Educational Tests & Measurements, grade: 1.0, University of Lagos (-), language: English, abstract: [...] According to Kidzu Thomas Oweh, teacher has the greatest potential to influence the student's education, while a student achievement is related to teacher's competence in using different methods of teaching. Thus, students achieve more when teachers employ systematic teaching procedures that make teaching and learning processes easier. In other words, excellent academic performance by students is not only attainable but could also be sustained through teacher method of teaching. These study therefore, examine the level of use and effectiveness of some selected methods of teaching economics in Lagos state secondary schools, specifically how teacher's effectiveness would bring about excellent academic performance through appropriate use of method of teaching. The purpose of these research works are stated below: i. To ascertain how learner attitude affect the method of teaching the students. ii. To identify the teaching methods, their academic performance and the factors affecting the students. iii. To evaluate the effects of method of teaching economics on the performance of students. iv. To examine the teacher methods of teaching and their qualification. v. To know the relationship between teacher methods and learning experience. vi. To establish relationship between teacher's methods of teaching economics and learner academics achievement.

The OECD's periodic review of Norway's economy. It finds that Norway has seen several years of strong growth and very low unemployment, but that it will not be untouched by the current slowdown. The survey examines three key economic challenges ...

Level of Use and Effectiveness of Some Select Method of Teaching Economics in Secondary Schools GRIN Verlag

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

ED 002 747-ED 003 960Strategies for Student Support During a Global Crisis

This book represents an ethnographic study of an International Baccalaureate Diploma Program in a school in mainland China, serving Chinese students and staffed by teachers from a variety of origins. It offers in-depth descriptions of the way in which students, teachers, and managers interact and communicate with one another in a variety of school activities. Through the communication process, cultural experiences and understandings are negotiated constantly among school participants. The ethnographic study also has a critical intention. Going beyond description, the author discusses the extent to which networks of social relationships in the case are imbued by asymmetries in power, and how this leads to people's inability, unwillingness, and unawareness to interact with those from different cultural backgrounds. As research findings reveal, where the construction of meaning is less

equally available to each participant, prejudice and exclusiveness are more likely to be assumed, impeding individuals' intercultural learning. The key is to empower those less privileged, giving them legitimacy to come to voice in an institutional context on the one hand, and protecting their reflections on hegemonic discourse meticulously on the other hand. Since the research explores the complexities and subtleties of the communication process that are bound to particular contexts, like most ethnographic studies, it aims at adding a body of experience and humanistic understanding of cultures, rather than testing theories. Although the IB Program being studied can hardly be representative of the overall development of international education in China, the detailed description of contextual issues of the case and the research procedures could facilitate the readers to vicariously experience these events, thus they can make their own decisions about the transferability of the research to their own unique situations.

The Economics of Social Determinants of Health and Health Inequalities Peterson's

South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts. But the quality of the output from the school system has been questioned. In seeking to identify the reasons for this, it is important to relate educational outputs (competencies, as measured for instance by examinations or standardized tests) to inputs. Determining the relative contributions of the inputs - of the school, the household and the individual learner - to educational outputs is not straightforward, particularly since very little educational production function analysis has been undertaken in South Africa. Until recently, no South African school data has incorporated test results, school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis. However, the results from a survey of a sample of schools involved in the large-scale Quality Learning Project (QLP), funded by the Business Trust, have yielded such data. The QLP data set offers a new analytical opportunity to address the question: What are the effects of social and economic variables on educational outcomes in the QLP schools?

Private schools have frequently provided innovative, experimental, and creative programs unavailable to students in the public system. The most successful have survived and expanded by offering an educational experience widely perceived to be not just as good as that available in the public system, but better. In Canada, private schools are enjoying an unprecedented popularity and while most are day-only, over sixty sustain boarding programs, as do two off-shore Canadian schools. The Handbook of Canadian Boarding Schools presents information on the educational environment of each province, then offers comparative information on each boarding school. The information on each school includes: basic data, location, history, philosophy, the campus, boarding facilities, health and safety, administration and faculty, student body and

student conduct, academic calendar and program, information technology, student activities and student conduct, admission and costs. The Handbook also supplies several appendices outlining important programs often available through boarding schools, such as Advanced Placement courses and the International Baccalaureate. For parents in Canada and abroad about to commit substantial sums to their children ' s education, the Handbook of Canadian Boarding Schools is an essential tool to help them make the right decision. It is also an indispensable resource for supporters of the public system looking for ideas that have worked elsewhere.

The Journal of Industrial and Engineering Chemistry Dundurn
Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

A Journal for Readers, Students and Teachers of History
Buros Inst of Mental

When a global crisis impacts nearly every industry, education is always one of the most impacted as students and faculty must frantically try to maintain their educational programs throughout uncertain times. Beyond the educational courses themselves being shifted online or to hybrid approaches, there must be a focus on the impact on students as well. With newfound ways of learning, new online environments, and new methods for teaching, students are greatly impacted by the changing face of education. The traditional ways in which students have been served and assisted have changed rapidly, and to make matters even more challenging, students must handle both living in a time of crisis while adapting to swift educational transformations. The dissemination of best practices and maintaining student success during global crises is an area of research that is not only growing in interest but is critical in pandemic times. Strategies for Student Support During a Global Crisis reflects on how educational professionals have worked with students during global crises, how serving and teaching students have been impacted, and the best practices for student success in both online education and hybrid formats. The chapters will include topics such as mentoring models, teaching methods, educational technologies, teacher insights, academic support services, and more. This book is ideal for educational professionals, leaders, school administration, teachers, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the best strategies for supporting students and promoting student success during global crises.

Tests in Print OECD Publishing

This book brings together recent research on interpersonal relationships in education. Clearly, positive teacher-student relationships strongly contribute to student learning. Problematic relationships on the other hand can be detrimental to student outcomes and development. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, teacher learning thrives when principals facilitate accommodating and safe school cultures. The contributions to this book are based on presentations at the first International Conference on Interpersonal Relationships in Education: ICIRE 2010 held in Boulder, Colorado, the United States and include among others keynote addresses by Kathryn Wentzel, Walter Doyle and Theo Wubbels. The chapters help explain how constructive learning environment relationships can be developed and sustained. Contributions

come from among others educational and social psychology, teacher and school effectiveness research, and communication and language studies, among other fields. They cover relationships of teachers with individual students and among peers, and relationships between teachers and teachers and principals.
