Economics in One Lesson Bloomberg Press

This book investigates the evolution of economic discourse from fully specialised texts towards popularisation. Popularising texts on economics and business-related matters has hitherto been a neglected and under-explored area of enquiry, and yet it deserves attention and study on account of the new fascinating insights it offers into specialised

language and discourse. The present book explores this under-researched area via the qualitative analysis of a modern genre, namely newspapers on the web. In particular, it scrutinises authentic extracts principally drawn from The Guardian Online in order to show, on the one hand, the popularising effect of the Internet on business and economic discourse, and, on the other hand, the realistic vocabulary currently used in economic and professional jargon. The introductory chapter discusses the popularisation of specialised text at large and of new media discourse in particular. It describes this phenomenon as a 'reformulation process' whereby specialised knowledge is transformed into everyday or lay knowledge, and also as a 'recontextualisation process' whereby popularisation discourse is adapted to the appropriateness conditions of the new genres and to the constraints of the media employed. Popularisation, it is claimed, implies relevant changes not only in terms of terminological simplifications and adaptations to the public's prior knowledge, but also in terms of the roles undertaken by the participants in the communicative event. The remaining chapters are organised into thematic units whose topics range from global economy, economic growth, and financial crisis to business management, employment, and sales. This part provides an in-depth investigation of various topics related to the economics and business worlds, combined with systematic explanations of linguistic phenomena at various language levels, from morphology to syntax, semantics, and the lexicon. In this book, the lexicon of ESP is offered in a fresh, less formal style, which will attract younger and non-expert readers alongside experts and professionals. The book is of considerable interest to students at undergraduate and postgraduate levels, lecturers, professors, entrepreneurs, specialists, and to those scholars who investigate ESP and its popularisation.

Newspapers In the Hands of a Child

This Palgrave Pivot demonstrates that the inherited vocabularies of economics and other social sciences contain socially constructed words and theories that bias our very understanding of history and markets, bridging the empirical and moral dimensions of economics in general and inequality in particular. Wealth, GDP, hierarchies, and inequality are socially constructed words infused with moral overtones that academic philosophers and policy analysts have used to raise questions about "fairness" and "justice." This short intellectual and epistemological history explores and elaborates a limited number of key inequality-related terms, concepts, and mental images invented by centuries of economists and others. The author challenges us to question the assumptions made concerning presumably value-free concepts such as inequality, wealth, hierarchies, and the policy goals a nation can be pursuing.

The Newbery Honor Book and New York Times Bestseller that is historical fiction with a hint of mystery about living at Alcatraz not as a prisoner, but as a kid meeting some of the most famous criminals in our history. Al Capone Does My Shirts has become an instant classic for all kids to read! Today I moved to Alcatraz, a twelve-acre rock covered with cement, topped with bird turd and surrounded by water. I'm not the only kid who lives here. There are twenty-three other kids who live on the island because their dads work as guards or cooks or doctors or electricians for the prison, like my dad does. And then there are a ton of murderers, rapists, hit men, con men, stickup men, embezzlers, connivers, burglars, kidnappers and maybe even an innocent man or two, though I doubt it. The convicts we have are the kind other prisons don't want. I never knew prisons could be picky, but I guess they can. You get to Alcatraz by being the worst of the worst. Unless you're me. Economics and the American Free Enterprise System Simon and Schuster "Economics is too important to be left to the economists. This concise and readable book provides non-specialist readers with all the information they need to understand how capitalism works (and how it doesn't). Economics for Everyone, now published in second edition, is an antidote to the abstract and ideological way that economics is normally taught and reported. Key concepts such as finance, competition and wages are explored, and their importance to everyday life is revealed. Stanford answers questions such as 'Do workers need capitalists?', 'Why does capitalism harm the environment?', and 'What really happens on the stock market?' The book will appeal to those working for a fairer world, and students of social sciences who need to engage with economics. It is illustrated with humorous and educational cartoons by Tony Biddle, and is supported with a comprehensive set of web-based course materials for popular economics courses."--Publisher's description.
