As population growth accelerates, researchers and professionals face challenges as they attempt to plan for the future. Urban planning is a significant component in addressing the key concerns as the world population moves towards the city and leaves the rural environment behind, yet there are many factors to consider for a well rounded community. The Handbook of Research on Social,

Economic, and Environmental Sustainability in the Development of Smart Cities brings together the necessary research and interdisciplinary discussion to address dilemmas created by population growth and the expansion of urban environments. This publication is an essential reference source for researchers, academicians, investors, and practitioners interested in the urban planning and technological advancements necessary for the creation of smart cities.

Irina H. Corten's Vocabulary of Soviet Society and Culture is an experiment in what Soviet scholars call *lingvostranovedenie*—the study of a country and its culture through the peculiarities of its language. Not a conventional dictionary, Corten's lexicon is selective, offering a broad sampling of culturally significant words in the areas of politics, ideology, the economy, education, arts and letters, social problems and everyday life as well as language associated with the personalities and activities of individual Soviet leaders. The

entries are listed alphabetically in English transliteration followed by the Cyrillic, although readers familiar with Russian may prefer to use the Cyrillic alphabet listing included in this volume. In each entry, the author provides a succinct but full explanation of the term and, whenever possible, cross-references to other entries, authentic examples of its use, and samples of relevant Soviet jokes. A reader may approach the lexicon either sequentially or with the aid of a subject thesaurus that divides the material into specific topics. A listing of complementary sources of reference appears in a useful bibliography. With this fascinating lexicon of "Sovietisms," Corten provides an invaluable and easily accessible medium for those general readers and scholars of the Russian language and Soviet culture interested in understanding contemporary

Soviet life. Selected entries from the Vocabulary of Soviet Society and Culture *Anekdotchik* (*anekdotchitsa*) (cyrillic spelling) (n.) 1: A person who tells jokes (*anekdoty*); 2: coll. since the late Stalin era, a person arrested and given a prison sentence for the telling of political jokes. The phenomenon indicates the important role of the political joke in Soviet culture and, specifically, in the dissident movement. See *iazychnik*; *sident*. The following jokes were popular during the Brezhnev era: 1. "Comrade Brezhnev, what is your hobby?" "Collecting jokes about myself." "And how many have you collected so far?" "Two and a half labor camps." 2. Question: What is a marked-down joke? Answer: A joke which, under Stalin, got you ten years in a labor camp, and now gets you only five. *egoístiki* (cyrillic) (n.; pl.). Lit., little egotists; coll. since the 1970s

referring to headsets worn by music lovers, especially teenage fans of rock music. The idea is that, by wearing headsets, one shuts out the world and becomes indifferent to everything except oneself. *zhrál'nia* (cyrillic) (n.). Der. *zhrat'*, to gorge, devour (vulg.); coll. since the 1970s denoting an eating establishment with inexpensive and often bad-tasting food. In the late 1980s, the term also has been applied to new fast-food restaurants which have been built in Soviet cities by Western concerns, for example, McDonald's. See *amerikanka*; *stekliashka*; *stoiachka*.

The Art of Barter IGI Global

The excitement of learning economics for the first time. The experience of a lifetime of teaching it. The Eighth Edition of *Exploring Microeconomics* captures the excitement of learning microeconomics for the first time through a lively and encouraging narrative that connects microeconomics to the world in a way that

is familiar to readers. Author Robert L. Sexton draws on over 25 years of teaching experience to capture readers' attention, focusing on core concepts and expertly weaving in examples from current events and popular culture to make even classic economic principles modern and relatable. The text sticks to the basics and applies a thoughtful learning design, segmenting its presentation into brief, visually appealing, self-contained sections that are easier for readers to digest and retain compared to sprawling text. Thoughtfully placed section quizzes, interactive summaries, and problem sets help readers check their comprehension at regular intervals and develop the critical thinking skills that will allow them to "think like economists." Exploring Microeconomics will ignite readers' passion for the field and reveal its practical application in the world around them.

International Macroeconomics Study Guide Carson-Dellosa Publishing

The motivation of this book is simple, yet fundamental: No complete understanding of the modern economy is possible without a thorough grounding in the field of innovation as an economic activity. The book, as its title emphasizes, aims at helping readers to gain a comprehension of two inextricably linked issues: challenging innovation and the future of human work. To this end, the book integrates a triad of topics: innovation as an economic activity, modus operandi of an

innovation-driven economy, and the persistent progression toward automation of human jobs. The main message conveyed by this book is that a creative economy will converge to an economy governed by smart machines aka robots, but will produce benefits if addressed in a rational manner. As to the salient features of this book, Accessibility: Accessible to readers with only cursory knowledge (if any) in economics Style: Adherence to a discursive, non-mathematical style Brevity: Covers material in a succinct, easily understandable manner, drawing upon real world examples Appendices: Each chapter is supplemented with appendices that elaborate upon pertinent real world examples and applications Self-contained: All the key concepts are defined and exemplified within the book Applicability: Uses examples that resonate with a wide audience of readers concerned about the advance of robots Non-mathematical diagrams: Provides accessible and readily understandable figures/graphs Protective stance: Contains a rational response to the march of the robots which is useful for workers of all ages

Personal, social, health and economic education (PSHE) and relationships, (sex) and health education (R(S)HE) are often undervalued in school and are frequently seen as an add-ons. But when taught well, PSHE and R(S)HE can enhance not only other subjects but strengthen school safeguarding, develop pupil well-being and

improve pupils' progress and resilience in learning. Underpinned by a range of contemporary research and illustrated through examples of classroom practice, the expert team of teacher educators look at a range of curriculum areas and contemporary issues to explore how PSHE and R(S)HE education can enhance other curriculum areas. As well as showing how pupils' life skills can be developed, they also explore how teachers' understanding of how PSHE and R(S)HE can be implemented without additional planning or expensive resources. The book takes an inclusive understanding of both diverse families and relationships throughout. Topics covered include: -social media, online presence and critical literacy skills -mental health coping strategies -plastic reducing -topical, sensitive, controversial issues (TSCIs) Covering the whole primary spectrum from Early Years to Key Stage 2, case studies from each phase are included within each chapter to help practitioners to relate the material to their own classroom. Points to consider for your setting are included and guidance on further reading provides reliable direction for additional information.

Karen Olsen's What Brain Research Can Teach About Cutting School Budgets is a practical guide for school leaders who are charged with the painstaking task of making budget cuts--a task typically driven by emotion, tradition, and the power of social leaders, followed by disagreements and dissatisfaction. This book offers an alternative--a way to use brain research to create powerful but politically neutral decision-making criteria. The author offers clear action items, brain research summaries, and checklists to guide leaders through the budget cutting process, and to ensure that they reinvest money into the key programmes that will truly impact student achievement.
