Section 1 Part A 1. The labor force is defined as all nonmilitary people who are employed or unemployed 2. People are unemployed if they are temporarily without work or not working but have looked for a job within the last 4 weeks 3. It created a new surge in factory jobs 4. The invention of the computer chip created growth in computer-related jobs 5.

Economics Section 1 Labor Market Employment equals L 1 units of labor per period. An individual firm takes that wage as given; it is the supply curve s 1 facing the firm. This wage also equals the firm ' s marginal factor cost. The firm hires l 1 units of labor, a quantity determined by the intersection of its marginal revenue product curve for labor MRP 1 and the supply curve s 1. We use lowercase letters to show quantity for a single firm and uppercase letters to show quantity in the market.

## The Economy That Wasn ' t Supposed to Happen: Booming Jobs ...

The firms who sold goods and services in the unit on supply and demand now become the buyers in the

labor market. Firms need workers to make products, design those products, package them, sell them, advertise for them, ship them, and distribute them, among other tasks. No worker will do this for free, and so firms must enter into the labor market and buy labor.
