Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: "Why am I here?" and "Will I ever use this?" Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.

Sarnikar cites evidence of frequent misconceptions of economics amongst students, graduates, and even some economists, and argues that behavioral economists are uniquely qualified to investigate causes of poor learning in economics. She conducts a review of the economics education literature to identify gaps in current research efforts and suggests a two-pronged approach to fill the gaps: an engineering approach to the adoption of innovative teaching methods and a new research program to enhance economists' understanding of how learning occurs. To facilitate research into learning processes, Sarnikar provides an overview of selected learning theories

from psychology, as well as new data on hidden misconceptions amongst beginning students of economics. She argues that if they ask the right questions, economists of all persuasions are likely to find surprising lessons in the answers of beginning students of economics.
