Roger Miller believes that students learn best when they are motivated, and that motivation comes when they connect an idea to their day-to-day lives. That is why every chapter of Economics Today is packed with thought-provoking applications that give immediate, common-sense reinforcement to economic concepts. From international to local, corporate to consumer, policy to personal, these examples spark lively discussion both in and out of the classroom. The result is that students gain a natural understanding of economic theory and analysis, and they learn to use economic reasoning in their everyday decisions. This text comes packaged with an

access kit for the new easy-to-use format of MyEconLab, which requires no set-up by the professor. With this, students can access practice problems for each chapter in the book, graphing questions, learning resources, and live tutoring. Professors who plan to use advanced course management online should order the book with MyEconLab in CourseCompass. View 'Alternate Versions' of this book on the web catalog page, or contact your local representative for details.

This book is aimed to help both students and

educators as a collection of the more math-intensive

practice problems that are often seen in introductory

microeconomics. There are no definition or concept

questions - just collections of problems in which math

is required. Students can use this for extra practice,

and faculty can assign the book for students as

needed. The text is presented in workbook

format. Students can show work, complete the

problems, and check answers that are provided

in the back of the text. Further, the equations and

problems are presented in a variety of ways to

benefit students receiving different methods of

instruction. This revised third edition adds new

problem sets with international trade,

compound interest, and net present value.
