A milieu in which citizens can freely examine information distinguishes a democracy from a fascist society that seeks to control and oppress knowledge. Society's ability to rid itself of COVID-19 has been prevented by groups that seek to repress information because they apparently view the pandemic to be in their interest. The stated official origin of COVID-19—that it was spontaneously generated from nature—is a myth that is being proselytized in a disinformation steamroll against freedom of information and critical thought. Investigative journalist Peter Tremblay suggests that COVID-19 is essentially a weapon of mass destruction (WMD) unleashed against humanity because of ideological goals. COVID-19 was spawned from the minds of evil men who seek to populate our planet Earth and pursue unlimited control over the remainder of a population that will no longer be the "humans" we are presently.

In its first ten years, what has the Asia-Pacific Economic Cooperation (APEC) accomplished? Has the 21-member forum - including the United States, Japan, China, Mexico, and most of Southeast Asia -- fulfilled its promise? To answer these vital questions, leading scholars at APEC Study Centres from thirteen APEC member economies undertook detailed studies of such central issues as trade in services, investment policy, human resource development, food and agriculture, energy, and financial stability. The findings are summarized in a policy report, "Learning From Experience", that has received wide praise and close scrutiny from senior government officials. The report concludes that APEC has successfully established itself as a world-class forum that has contributed to the affirmation of a coherent set of positive ideas. However, the report notes shortcomings in each of the critical areas of trade and investment liberalization, economic and technical cooperation, and institutional structure, and offers remedial policy recommendations to improve APECs future performance. This volume contains both the policy report and the issue studies. It is the product of the APEC International Assessment Network (APIAN), a collaborative, independent project among participating APEC Study Centres to track and assess the design and execution of key APEC initiatives.
