Value Added Tax – a  
thorough analysis Given  
the ever increasing  
importance of indirect  
taxation as a source of  
revenue for governments,*

---

and the increasing complexity of legal framework as well as the increasing number of countries adopting indirect taxation, it is highly important to closely watch how the law is actually applied in practice. The main driving force in this area is undoubtedly the European Court of Justice. This book offers a thorough analysis but also keeps track of the ongoing developments in this area. It analyses selected topics (e.g. abuse and anti-avoidance measures, taxable base and rates, treatment of Public Bodies, exemptions, and deductions) by looking at the most important and recent judgments of the Court of Justice of the European Union. Experts from all over the world,

not just from academia but also government representatives and tax practitioners, have given their input and helped to put together what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis.

ECJ - Recent Developments in Value Added Tax OUP

Oxford

The EU Citizenship Directive defines the right of free movement for citizens of the European Economic Area. It applies to EU citizens and their family members who move to another Member State. This might at first seem like a straightforward definition, but immediately questions arise. Who determines if a person is an EU citizen at all? What about dual citizens of two Member States, or of one Member State and a non-Member State

---

(a 'third State')? What is the position of EU citizens who move to one Member State, and then return to their home Member State? This book provides a comprehensive commentary of the EU's Citizens' Directive tracing the evolution of the Directive's provisions, placing each article in its historical and legislative context. Special emphasis is placed on highlighting the connections and interactions between the Directive's constituent provisions so as to permit a global appreciation of the system of free movement rights to which the Directive gives effect. Each provision is annotated containing a detailed analysis of the case-law of the Court of Justice as well as of related measures impacting upon the Directive's interpretation including European Commission reports and guidelines on the Directive's implementation. The authors have drawn on

their combined experience in academia, practice and the EU institutions to provide an engaging and critical account of the Citizenship Directive, approaching it directly from an EU law perspective.

Oxford University Press

This study compares cross-border consumption taxation of digital supplies in business-to-consumer transactions from an international coordination perspective. Hence, the various classifications of digital supplies and the provisions for deciding the place of taxation are compared and examined to identify cases of double taxation and unintentional nontaxation or potential risks thereof. In addition, possible remedies for double taxation and unintentional nontaxation are discussed.

Mystery crime fiction written in the Golden Age of Murder A Christmas party is punctuated by a gunshot under a policeman's watchful eye.

---

A jewel heist is planned amidst the glitz and glamour of Oxford Street's Christmas shopping. Lost in a snowstorm, a man finds a motive for murder. This collection of mysteries explores the darker side of the festive season—from unexplained disturbances in the fresh snow, to the darkness that lurks beneath the sparkling decorations. With neglected stories by John Bude and E.C.R. Lorac, as well as tales by little-known writers of crime fiction, Martin Edwards blends the cosy atmosphere of the fireside story with a chill to match the temperature outside. This is a gripping seasonal collection sure to delight mystery fans

*Hearings Before and Special Reports Made by Committee on Armed Services of the House of Representatives on Subjects Affecting the Naval and Military Establishments* Hart Publishing  
'EC Employment Law' provides a thorough and authoritative

guide to EC law on employment, within a social and economic context. Extensive coverage is given of complex equality caselaw and legislation, and many issues not covered elsewhere are examined.

Science & Business Media  
Peer-to-peer (P2P) networks – decentralized group structures allowing anyone to easily download and share resources online – already play a critical role in the distribution of digital content. Most of the debate on P2P heretofore has focused on copyright issues. However, as the basis for legitimate business models a number of companies have already quietly embraced, P2P has a largely unknown and underestimated impact on taxation, with vast repercussions on the development of mature, profitable markets. This

---

book analyses the current framing for digital and media supplies provided via P2P technologies through the lens of an interdisciplinary approach drawing on tax law, computer science, economics, copyright law, and business studies. VAT concepts such as those of economic activity and taxable person, taxable transactions, consideration, barter and taxable amount, and territoriality rules are discussed in connection with P2P, as is the evaluation of VAT liability for P2P operations in the presence of copyright infringement. Topics and issues considered include: - centralized and decentralized P2P networks; - free-riding problems; - identifying actors in P2P networks for VAT purposes; - P2P and place of supply; and - pros and cons of integrating P2P with taxation regimes and especially VAT systems. The analysis draws on a vast range of sources, including EU legislation and case law, tax law literature and doctrine, international conventions and treaties, Council of Europe and OECD documents, ECHR case law, and official documents and cases from key jurisdictions worldwide, offering the first thoroughly grounded approach to overcoming the lack of understanding and awareness of ongoing changes currently separating the digital economy and traditional taxation systems, and a solid platform for discussion to the diverse communities of researchers and professionals interested in P2P.

Routledge

This book explores the extent to which European

Community law confers upon individuals the right to gain access to public services in other Member States. Are European citizens and third country nationals who have moved to other Member States entitled to claim minimum subsistence benefits, to receive medical care or to be admitted to education? Does

Community law provide for a freedom of movement for patients, students and persons in need of social welfare benefits? If so, to what extent does Community law have regard for the Member States' fears for, and concerns about, welfare tourism? Besides

addressing numerous detailed questions on the precise degree to which Community law allows for cross-border access to public services, the author analyses how

Community law, and the Court

of Justice in particular, have sought to reconcile the Community's objectives of realising freedom of movement and ensuring equality of treatment with the need to develop and maintain adequate social services within the Community. In addition, the book contains a detailed analysis of United States constitutional law on cross-border access to public services, exploring the question whether the European Community can possibly learn from the American experience.

### **Human Rights in the Market**

**Place** Linde Verlag GmbH

The ideology of human rights protection has gained considerable momentum during the second half of the twentieth century at both national and international level and appears to be an effective lever for bringing about legal change. This book analyzes this strategy in economic and commercial policy and considers the transportation of the 'public law' discourse of

---

basic human rights protection into the 'commercial law' context of economic policy, business activity and corporate behaviour. The volume will prove indispensable for anyone interested in human rights, international law, and business and commercial law.

This textbook offers an

introduction to all areas of EU law found on introductory courses. Explanations and descriptions are set out clearly and simply, with summaries of key cases to illustrate the points of law.

*"Electronic Purses in Euroland: why Do Penetration and Usage Rates Differ?"* Oxford University Press

The current European VAT legislation encompassing insurance and financial services, including intermediation thereof, dates back to the adoption of the Sixth VAT Directive in 1977. The definitions do not, however, encompass the current complexity of insurance and financial transactions. This has resulted in considerable confusion for fiscal authorities and for businesses when deciding

---

upon the application of the VAT exemption. As the correct VAT treatment has a significant economic impact on businesses, a great number of cases have been referred to the Court of Justice of the European Union. This is also the reason why the European Commission presented its proposal for the future treatment of insurance and financial services, including intermediation thereof, in November 2007. The political process has not yet been finalised and if the Commission's proposal is agreed upon, the question of understanding the definitions still exists. This book deals with the exemption for intermediation of insurance and financial services within European VAT. This implies analysing the methods of interpretation applied by the

Court of Justice of the European Union when interpreting the provisions regarding insurance and financial services. Furthermore, the current definitions for intermediation of insurance and financial services as provided for in the VAT Directive are analysed and conclusions are made in order to define a single concept of intermediation. These analyses are followed by various practical scenarios from case law of the Member States concerning intermediation of insurance and financial services. Finally, comments based on the analyses carried out are given on the European Commission's proposal for amending the VAT Directive and the accompanying Regulation regarding intermediation of

---

insurance and financial services.

The EU Citizenship Directive defines the right of free

---

movement for citizens of the European Economic Area. It applies to EU citizens and their family members who move to another Member State. This might at first seem like a straightforward definition, but immediately questions arise. Who determines if a person is an EU citizen at all? What about dual citizens of two Member States, or of one Member State and a non-Member State (a 'third State')? What is the position of EU citizens who move to one Member State, and then return to their home Member State? This book provides a comprehensive commentary of the EU's Citizens' Directive tracing the evolution of the Directive's provisions, placing each article in its historical and legislative context. Special emphasis is placed on highlighting the connections and interactions between the Directive's constituent provisions so as to permit a global appreciation of the system of free movement rights to which the Directive gives effect. Each provision is annotated containing a detailed analysis of the case-law

of the Court of Justice as well as of related measures impacting upon the Directive's interpretation including European Commission reports and guidelines on the Directive's implementation. This fully-updated new edition includes discussion of relevant case law since the first edition, and has been expanded to include detailed discussion of rights of EU and UK citizens after Brexit in the withdrawal agreement.

*EC Employment Law*  
*EU Asylum and Immigration Law* examines in detail the EU legislation and case law on the issues of immigration, asylum, visas and border controls, discussing the impact and ongoing development of EU law in these complex and controversial areas. The updated edition particularly covers new EU legislation, case law, and operational developments since 2010 on: internal border checks; external border controls; visa lists; litigation to obtain a visa; the Schengen Information System; the Visa Information System; family reunion; non-EU students; long-term residents; all

---

aspects of refugee law (including the definition of 'refugee' and subsidiarity protection, the rights of asylum-seekers, and Member States' responsibility for asylum-seekers); and irregular migrants' rights. It also covers the institutional framework for these issues, the related human rights aspects, and the connections with other areas of EU law, like the free movement of EU citizens. Steve Peers' seminal text on the justice and home affairs law of the European Union appears in its fourth edition and is now available in two separate volumes covering asylum and immigration law, and criminal law, policing, and civil law, and as a two-volume set. It provides a detailed examination of EU legislation and case law on the issues of immigration, asylum, visas, border controls, and police and criminal law cooperation, discussing the impact and ongoing development of EU law. This edition is the definitive guide to these intricate, contentious, and fast-developing areas of EU law, and will be invaluable to scholars,

practitioners, and students in the field.
