If the Buddha Dated Wentworth Press  
Drawing on material on the reign of Henry  
VI, Tim Card continues his history of Eton  
College, and offers a different view of the  
foundation from previous histories. As was  
recorded in an early diary: "Every vice and  
virtue we meet in the world outside is  
practised here although in miniature."

Vibration Problems in Machines  
explains how to infer  
information about the internal  
operations of rotating machines  
from external measurements  
through methods used to resolve  
practical plant problems.

Second edition includes summary  
of instrumentation, methods for  
establishing machine rundown

data, relationship between the  
rundown curves and the ideal  
frequency response function. The  
section on balancing has been  
expanded and examples are given  
on the strategies for balancing  
a rotor with a bend, with new  
section on instabilities. It  
includes case studies with real  
plant data, MATLAB® scripts and  
functions for the modelling and  
analysis of rotating machines.

## **Vibration Problems in Machines**

Springer

The popularity of The Seven Deadly  
Sins dates back to the 4th Century.  
They enjoyed tremendous notoriety  
during the period we call the Middle  
Ages. While the popular assortment of  
sins is not directly from scripture, they  
have been the subject of many a  
sermon, lecture, writing and art. In his  
book The Seven Deadly Sins: And Why  
We Love Them, Steinbacher examines  
each in detail. He gives examples of  
how they effect us and how we conduct  
ourselves in this world. Included in this  
book is Steinbacher's essay, An Angel In  
My Garden.

What happened at 10 Rillington Place was so  
shocking and gruesome that even today everyone

---

over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

*Think First* Manual of Procedure in the Supreme and Exchequer Courts of Canada  
Wall Paintings of Eton

This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural*

*Politics of Education*.

**Driving Great Results** Archway Publishing  
Diamonds are a multi-billion dollar business involving some of the world's largest mining companies, a million and a half artisanal diggers, more than a million cutters and polishers and a huge retail jewellery sector. But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and weapons-trafficking. *Diamonds* brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations. This part of the diamond story has rarely been told.

*Adult Coloring Books* WETFEET, INC.

*Safety and Health Essentials* is the leading introductory guide to industrial safety and health. Written by a team of specialist contributors, under the editorship of William Martin, the book covers all aspects of safety management and will be a companion to the more detailed treatment found in *Industrial Safety & Hygiene Handbooks*. The book is most useful to small companies that do not have or cannot afford a full-time safety officer and to business managers and human resources staff who have responsibilities for health and safety issues in the workplace. The book will cover all the most recent developments in health and safety laws, standards, techniques, and practices. Provides a leading introductory guide to industrial safety and health Specialist contributors cover all aspects of safety management, including recent developments

**How Cool Are Penguins** is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

**LEED Pass** Routledge

The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book

to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds  
The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

**Safety and Health Essentials** Penguin

This stunningly illustrated publication brings together the body of recent research into these internationally important wall paintings, giving a comprehensive description of their creation and patronage.

**A House to Remember** Wiley Global Education  
Prepared by the Highway Innovative Technology Evaluation Center (HITEC), a CERF service center. This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the MSE Plus System, manufactured by SSL, LLC, for use as a mechanically stabilized earth retaining system. The evaluation was conducted based on material, design, construction, performance, and quality assurance information outlined in the HITEC Protocol. The MSE Plus System features rectangular segmental precast concrete facing panels and galvanized welded wire, grid-type soil reinforcement.

The Poetical Works of Fitz-Greene Halleck  
Rowman & Littlefield

God created animals with everything they needed. To be content and succeed, He designed homes perfectly suited to each one. However, the animals were unhappy with the places that God had made for them and eventually gave into the insecurities and fears they all felt. Owl was frightened of the dark, Mountain Goat became faint-hearted as he looked down from the narrow mountain ledge. Duck panicked every time she neared the water. Camel detested the hot, dry wind and Penguin hated the icy cold. Through whimsical illustrations and creative prose, "God Gave Me Everything I Need To Be Me!" encourages self acceptance, individuality and appreciation as the animals finally realize God had given them exactly what each one required to make them complete.

When monsters appear on Earth, Maggie MacKay is on the job. No one is better at hauling the creepy crawlies back where they belong. No one, that is, except Maggie's dad, who vanished in the middle of an assignment. Now, an elf named Killian has shown up with a gig. Seems Maggie's uncle teamed up with the forces of dark to turn Earth into a vampire convenience store, serving bottomless refills on humans. Ah, family... The only hope for survival lies in tracking down two magical artifacts and a secret that disappeared with Maggie's dad. **WARNING:** This book contains cussing, brawling, and unladylike behavior. Proceed with caution.

*Maggie for Hire* John Murray Pubs Limited

In a turbulent global economy, the popular idea of declining farms and factories is largely unfounded. UN and World Bank data show growing output everywhere, but it remains hidden by the faster-

growing service sector. Engineers, programmers, surgeons, and pilots make up an increasing share of what is actually the service sector, showing that this sector is not in decline. There is no doubt that industries are shifting, but how does it all add up? Quantifying these technology-driven shifts is fundamental, yet such publication has lagged for years, with stale ideas about what makes a healthy economy persisting since the 1940s. In this new work, Atikian gives us a freshly updated overview countering our tired assumptions about off-shoring, low wages, and industrial decline and providing us with...some fact based confidence in the economy.

**The Last Blue Mountain** FriesenPress  
Construction Equipment and Methods: Planning, Innovation, Safety fosters engineers who are information literate and able to approach complex engineering and managerial problems with confidence and skill. Students of this text will fully appreciate the practical aspects of being a construction engineer and manager, the dual nature—both technical and managerial—of the responsibilities. The text helps build these skills through: a cohesive view of construction technology, its safe use to maximize productivity, and how the principles of science are being applied; linking the material in this course to their previous courses (such as statics or geotechnical engineering); and pedagogy designed to promote knowledge, and skill acquisition, such as case studies and open-ended problems. Students will be engaged by relevant subject matter, informed by the author's hands-on research in advanced technologies, mechatronics, robotics, ergonomics/safety, etc. The wide variety of pedagogical devices in the text will appeal to all different learning styles, and provide

---

teachers with more opportunities and resources to get students to reflect about what they are learning, to connect the new to their past experiences, and to understand its relevance to their future.
