A Love Story Addison-Wesley

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in Invisible Women † ‹ , diving into women ' s lives at home, the workplace, the public square, the doctor ' s office, and more. the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable expos é that will change the way you look at the world.

Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning.
