This edited volume
is an inquiry into
the ethics of
mathematics
education, and to a
lesser extent, the
ethics of
mathematics. The
imposition of
mathematics for all
raises questions of
ethics. What are
the ethics of
teaching school
mathematics? What
are the costs as

benefits? What are
the ethical issues
raised by the
official aims of
mathematics
teaching, the
planned curriculum,
the pedagogies
employed in school

mathematics and the

These questions are
addressed in the
book as well as
what systems of

ethics we might use.
The volume ventures
into a burgeoning

offers a unique set
of investigations,
both theoretical
and in terms of
