**Decision Mathematics** Heinemann  
'Mathematics and Statistics in Biology, Psychology and Chemistry' comes as the third in the series, following in the footsteps of 'Easy as You Go!' and 'A-Star Question Bank. It fills the vacuum which exists, being caused by the apparent difficulty in professional Biologist, Psychologist and Chemist to effectively teach the necessary Mathematics for their students to pass examinations. Much of the mathematics and statistics for students' studies is admittedly complex, and often it is laid out in course books in a confusing manner. With the exception of Physicists, scientists can be excused in not being as effective as their counterparts in the Mathematics arena. Considerable effort has therefore been exercised in an attempt to address this situation. In Biology and

Psychology sections, tables have been used to simplify many of the otherwise daunting procedures. In Chemistry a 'step-by-step' approach has been adopted.

"This book is for students working towards A Level Mathematics. Together with Book 1 it covers all the Pure Mathematics necessary for the full A level. It can be used in the classroom, and also contains sufficient explanations and worked examples for students working on their own. The exercises are plentiful, and graded in difficulty, to allow students to build confidence where necessary, and to extend themselves where possible. The work is collected into sections on Algebra, Coordinate Geometry, Binomial Expansion, Calculus, Trigonometry, Exponentials and Logarithms, Vectors and Proof, in line with the 2017 syllabus, and is suitable for use by students studying under any of the main examination boards."--Page v.
