Exploring the Edge of Empire Springer Nature
An interdisciplinary approach, crucial as it is in most fields of research, proves itself to be unescapable in the study of interactions between the

ancient Armenian and Greek worlds and literatures. The volume arises from such an awareness and collects papers presented in a conference which has been organized in 2013 at the University of Genova, thanks to a cooperation with the Université Paris-Sorbonne, following in the footsteps of a tradition inaugurated by Giancarlo Bolognesi in the years '80 and '90. The subject is explored from many points of view: the topic of Armenian translations of Greek texts – with considerations of a methodological nature and

the discussion of case-studies – , aspects which pertain to the historical context and the historiographical sources, the wide theme of the Armenian reception of Biblical, Christian and Byzantine literature, and finally philological, linguistic and lexical problems. The aim of this kind of research is to exploit the cooperation among classical philologists, linguists and Armenologists, in order to face the challenge of investigating a subject which requires many different competences.

Anne Ancelin
Schutzenberger explains and provides clinical examples of her unique psychogenealogical approach to psychotherapy. She shows how, as mere links in a chain of generations, we may have no choice in having the events and traumas experienced by our ancestors visited upon us in our own lifetime. The book includes fascinating case studies and examples of 'genosociograms' (family

trees) to illustrate how her clients have conquered seemingly irrational fears, psychological and even physical difficulties by discovering and understanding the parallels between their own life and the lives of their forebears. The theory of 'invisible loyalty' owed to previous generations, which may make us unwittingly re-enact their life events, is discussed in the light of ongoing research into transgenerational therapy. Anne Ancelin Schutzenberger draws on

over 20 years of experience as a therapist and analyst and is a well-respected authority, particularly in the field of Group Therapy and Psychodrama. First published as *Aie, mes Aieux* this fascinating insight into a unique style of clinical work has already sold over 32,000 copies in France and will appeal to anyone working in the psychotherapy profession. [Doing Business 2012](#) Harvard University Press India's irrigated agriculture sector

has been basic to India's economic development and poverty alleviation. One of India's major achievements is its rapid expansion of irrigation and drainage infrastructure. However, the major emphasis on development has been achieved at a cost. The importance put on new construction

has diverted attention away from the need to ensure the quality, productivity, and sustainability of the services. Further, a governmental subsidy based approach has been used and this has resulted in irrigation and drainage services which, while enabling significantly

higher productivity than from non-irrigated lands, are well below their potential. 'The Irrigation Sector' discusses directions for future growth, the framework for reform, and the reform agenda. Modern Western Armenian for the English-speaking world Mazda Pub Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations

affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall "ease of doing business", and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on

connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new "distance to frontier" measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good

rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The Doing Business report, which was started in 2003, has become one of the key ways in

Crescenta Valley manages to retain its small town flavor due to its geography--a small valley nestled between two mountain ranges--and the people who prefer this way of life. The community is marked not only by what has changed, but more importantly, by what has not. The Crescenta Valley Springer Science & Business Media Fully revised and updated, Tom de Waal's *The Caucasus* is an essential and authoritative introduction to this complex region. Armenia, Azerbaijan, Georgia, and the breakaway territories that have tried to split away from these states

constitute one of the most diverse and challenging regions on earth, impressing the visitor with their multi-layered history, ethnic complexity, and seemingly intractable conflicts. Over the last few years, the South Caucasus region has captured international attention again because of its role in disputes between the West and Russia, its unsolved conflicts, and its role as an energy transport corridor to Europe. De Waal begins with a historical overview and then shifts his attention to the contemporary era, particularly the roiling conflicts over

Nagorny Karabakh, South Ossetia, and Abkhazia. He also analyzes the energy politics of the region, the 2008 "Five-Day War" between Georgia and Russia, and recent political changes in all three countries. In addition, the book features brief snapshots of fascinating side topics such as Georgian wine, Baku jazz, and how the coast of Abkhazia came to be known as the "Soviet Florida." Concise, stimulating, and rich in detail, *The Caucasus* is the perfect guide to this fascinating and misunderstood region. *The Soft Power of the Russian Language* John Benjamins

Following the death of his ten-year-old son, physician Peter Croft embarks on a desperate, seemingly random search for a missing child, risking his sanity, even his life in a grief-induced quest. His journey propels him into the darkest reaches of human suffering and pits him squarely against an adversary whose own obsession defies all reason. Here *After* is a story of love, loss, obsession and redemption, with gripping action sequences and a subtle paranormal underpinning. This publication is the third in a series of annual reports giving a comparative analysis of business regulations and their enforcement across 155 countries and over time. Comparable data indicators are given for 10 topics: starting a business, dealing with licences, hiring and firing workers, registering property, getting credit, investment protection, paying taxes, trading across borders, enforcing contracts, and closing a business. These

indicators are used to assess socio-economic outcomes including levels of unemployment and poverty, productivity, investment and corruption; and to identify which regulatory measures enhance business activity and those that work to constrain it. This is a co-publication of the World Bank and the International Finance Corporation.

Zoroastrianism in Armenia Suren G. Hakobyan

This book analyzes Armenian civil society in the context of post-communist democratization. It explores

persistent challenges to civic engagement under Armenia ' s semi-authoritarian regime, and also highlights success stories of public mobilization and social impact. Drawing on a broad range of methods and empirical sources, the book provides a comprehensive overview of the re-emerging diversity of Armenian civil society: from formal organizations to spontaneous activism. It combines a country-level analysis of broad patterns in the country ' s political culture

with the life stories of individual agents of change, contrasting public apathy with young activists ' enthusiasm. By exploring mobilization strategies and narratives in Armenian civil society, the book provides valuable new insights into the roots of the mass public uprising in spring 2018. If not, the only thing that lies ahead is the fate of the void.

The first part of the study discusses the origins of the Armenians, the Urartian Kingdom, Armenia and the Achaemenid, Seleucid, Parthian, Roman, Sasanid and Byzantine periods. It also examines Christianity in Armenia and the development of an alphabet and literature. The work then continues with the history of Armenia during the Arab, Turkish and Mongol periods. A separate chapter deals with the history of Cilician Armenia and the Crusades. The second part concentrates on the Armenian communities in the Ottoman,

Persian, Indian, and Russian empires (1500-1918). It also details the Armenian diaspora in Eastern and Western Europe, Africa, the Arab World, the Far East, and the Americas. The study concludes with lengthy chapters on the history of the three Armenian republics (1918-1920); (1921-1991 Soviet Armenia); and the current Armenian republic (1991-2001)

One of the revelations with photography is that monochrome images often

enable us to see the world and importance of landscape, people in new, and often deeper, ways. Colour is such a dominant part of our vision that we often overlook more subtle variations in tones and textures. This book is a companion volume to the colour book "Rewilding the Human Spirit", but instead of repeating the contemporary narrative contained in that book, this work includes a range of directly relevant quotations which show and help to explain humans' deep and intrinsic connection to our natural world. The

nature and our natural world is shown both through these quotations and through just over 130 monochrome fine art nude images, involving 15 different women aged 24 to 43. The works have been shot in a range of natural locations around Europe. Deli Sarkis: The Scars He Carried World Bank Publications

A Turk 's discovery that Armenians once thrived in his hometown leads to a groundbreaking investigation into the local dynamics of genocide. Ümit Kurt, born and raised in Gaziantep, Turkey, was astonished to learn that his hometown once had a large and active Armenian community. The

Armenian presence in Aintab, the city ' s name during the Ottoman period, had not only been destroyed—it had been replaced. To every appearance, Gaziantep was a typical Turkish city. Kurt digs into the details of the Armenian dispossession that produced the homogeneously Turkish city in which he grew up. In particular, he examines the population that gained from ethnic cleansing. Records of land confiscation and population transfer demonstrate just how much new wealth became available when the prosperous

Armenians—who were active in manufacturing, agricultural production, and trade—were ejected. Although the official rationale for the removal of the Armenians was that the group posed a threat of rebellion, Kurt shows that the prospect of material gain was a key motivator of support for the Armenian genocide among the local Muslim gentry and the Turkish public. Those who benefited most—provincial elites, wealthy landowners, state officials, and merchants who accumulated Armenian capital—in turn financed the nationalist movement that

brought the modern Turkish republic into being. The economic elite of Aintab was thus reconstituted along both ethnic and political lines. The Armenians of Aintab draws on primary sources from Armenian, Ottoman, Turkish, British, and French archives, as well as memoirs, personal papers, oral accounts, and newly discovered property-liquidation records. Together they provide an invaluable account of genocide at ground level.

There is a great deal of interest in the history of Armenia since its renewed independence in the 1990s and the ongoing debate about the genocide - an interest that informs the strong desire of a new generation of Armenian Americans to learn more about their heritage and has led to greater solidarity in the community. By integrating themes such as war, geopolitics, and great leaders, with the less familiar cultural themes and personal stories, this book will appeal to general

readers and travellers interested in the region.
