Via the Web. In manufacturing, new communication technologies have ushered in a new era for the team-based product development strategy of concurrent engineering. Known as collaborative engineering, the new phase makes it unnecessary for team members to be in the same room. seated around the same table. The team members can be scattered around the facility, around the city, around the country, and even around the world, and can still contribute their valuable input. More complex than traditional concurrent engineering, collaborative engineering not only deals with collaboration itself, but also the infrastructure and environments that enable and nurture it. Going far beyond describing the use of the internet, Anthony Mills thoroughly examines the principles, applications and various tools relevant to this new age of industrial communications. He explains how an organization can use them effectively in welding together personnel and suppliers - no matter how far flung - so that they can play major roles in the organization's success.

Thomas Register of American Manufacturers and Thomas Register Catalog File Society of Manufacturing Engineers Learn from an anthology of contributing authors and experts who share, step-by-step, how to justify and manage the ROI for the BR Approach. The book covers the business's perspective and the technology perspective. Authors represent the healthcare industry, financial services experience, state and federal government experience, and senior practitioners spanning many industries. This book accomplishes the following: 1) It is for managers and decision-makers who make things happen in their organization. 2) It addresses BRs as a leverage for agility, compliance, and corporate intelligence, as a key mechanism for engineering the business itself. 3) It is not meant to be read cover-to-cover. Business people will focus on section 2. Technical people will focus on section 3. 4) Together, the sections provide a step-by-step management approach that crosses business and IT barriers. 5) Real case studies are written by real people in well-respected corporations, government agencies, consultancies, and software vendors. 6) Leading technology is highlighted. 7) Present the possibilities that BR Approach can achieve for both business and IT
