consists of a  
selection of  
papers presented  
at the Ninth World  
Congress of  
Comparative  
Education, held at  
the University of  
Sydney, Australia,  
in July 1996, on  
the theme of  
"Tradition,  
Modernity and  
Post-modernity in  
Comparative  
Education".  
Before presenting  
the selection, this  
introduction will  
first survey the  
changing

---

discourse in comparative education over the past few decades and will argue that an unreformulated and uncritical postmodernity holds no greater promise in comparative education, than its uncritical modernist or tradition-oriented rivals. When Nicholas Hans (1949) cited Michael Sadler's early rationale for studying comparative education, it was within the context of a work which sought to identify the traditions that underlay national educational systems. This early work, together with others such as that by Isaac Kandel (1930) was predicated on the assumption of the importance of national character, of which education systems were an important component. Indeed from this perspective, the purpose of comparative education was not merely to analyse the "forces and factors" which produced differences among educational systems, but, implicitly at least, also "to discover the underlying principles which govern the development of all national systems of education" (Hans 1949: 5). Hans was preeminently an historian, of course (as was Kandel to an extent), and therefore saw comparative education first and foremost in this light.

 Bloomsbury Publishing  
 This book provides an up-to-date and well-grounded analysis of education in Australia, New Zealand and the Pacific, including Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu. Leading writers from

---

throughout this region identify contemporary educational challenges, issues, and priorities while drawing upon their own ongoing empirical research. Key themes include the impact of international trends and developments; educational reform and the quality of education; indigenous learning; inclusivity; aid and development co-operation; and the changing role and place of tertiary education. Detailed studies of specific educational systems and developments are considered in the light of broader analyses that run throughout the volume.

government initiatives and other factors that can contribute to quality teaching. Commonwealth Education Partnerships, 2007 Nexus Strategic Partnerships Ltd. Beyond Binaries in Education Research explores the ethical, methodological, and social justice issues relating to conceptualizations of binary opposites in education research, particularly where one side of the dualism is perceived to be positive and the other negative. In education research	these may include ability-disability, academic-vocational, adult-child, formal-informal learning, male-female, research-practice, researcher-participant, sedentary-mobile, and West-East. Chapters in this book explore the resilience of binary constructions and present conceptual models for moving beyond them and/or reconceptualizing them to facilitate more productive approaches to education provision. With contributors from authors working in a multitude of	educational fields and countries, this book provides a significant contribution to the ongoing challenge to seek new ways to move beyond binaries in education research. <u>Orana</u> Commonwealth Secretariat "This collection of articles and interviews explores policy, practice and attitudes relating to the use of Pacific languages in education systems of most Pacific Island countries and territories, from pre-school to tertiary level. It records history ; it

<p>deals with current attitudes and prejudices ; and it focuses attention on perceived problems with the medium of education in many parts of the region."--Back cover.</p> <p>The Current Status of Education Reforms in Papua New Guinea Multilingual Matters</p> <p>"The report describes the efforts of 144 countries and territories to meet their international commitments to eliminate the worst forms of child labor."...Elaine L. Chao.</p>	<p><u>Pacific Languages in Education</u></p> <p>Routledge</p> <p>The cultural diversity of the Asia-Pacific region is reflected in a multitude of linguistic ecologies of languages of lesser power, i.e., of indigenous and immigrant languages whose speakers lack collective linguistic power, especially in education. This volume looks at a representative sampling of such communities. Some receive strong government support, while others receive none. For some indigenous</p>	<p>languages, the same government schools that once tried to stamp out indigenous languages are now the vehicles of language revival. As the various chapters in this book show, some parents strongly support the use of languages other than the national language in education, while others are actively against it, and perhaps a majority have ambivalent feelings. The overall meta-theme that emerges from the collection is the need to view the teaching and learning of these languages in</p>

relation to the different needs of the speakers within a sociolinguistics of mobility.

Beyond Binaries in Education Research  
BRILL

This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to

prepare well-qualified specifically.

professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy, and engineering pedagogy more

The Department of Labor's 2002 Findings on the Worst Forms of Child Labor

Routledge

The study is the result of an international collaborative project supported and funded by the Carnegie Corporation of New York. This multi-year venture has involved a research team of some forty chapter authors and commentators.

The research has been accompanied by three major workshops on project methodology, initial chapter reviews and final discussions.

A point was made of including both scholars and practitioners involved in power-sharing settlements in the review process, in the hope that more would be learned about the

---

actual implementation of the settlements under investigation. The project team was united in its wish to explore whether long-standing secessionist conflicts have been addressed effectively through the significant number of self-determination settlements that were generated in response to the wave of internal conflicts of the 1990s. It was also committed to testing whether consociationalist and integrative techniques of conflict settlement really are as mutually exclusive as is sometimes supposed, or whether they can in fact be mutually reinforcing. Finally, the project derives its impetus from the necessity to critically rethink the doctrine of self-determination. One may question

whether its traditional, restrictive interpretation will be adequate in confronting the wide variety of future challenges to the territorial integrity of states.

The State and Its Enemies in Papua New Guinea

Springer

This title was first published in 2001. Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities.

This text examines the wisdom of such a move when many of the conditions necessary for its success are not present. It concludes

that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach. Quality assurance also provides more focus and direction to the work of the traditional university system. However, it must be modified to suit the conditions prevailing in developing countries by being simple in design, modest in expectations and realistic in requirements. Teacher Professional

Development Case Studies Routledge  
This book provides the global mathematics education community with information on the recent and current status of the teaching of mathematics in a group of island nations in the Asia-Pacific region. Sri Lanka, Indonesia, Japan, the Philippines, Australia, Papua New Guinea, New Zealand, and twelve nations in the South Pacific Ocean. It is the third volume in a series conceived by Dr Bruce Vogeli of Columbia University Teachers College and published by WSP, aimed at producing

contemporary accounts of mathematics teaching in a world-wide group of nations. Previous volumes have covered Central and South American nations and a selection of Muslim nations respectively. Language Planning and Policy World Scientific  
Contains information about the key sectors in Papua New Guinea (PNG), such as LNG and agriculture, as well as investment opportunities and interviews of important politicians and businesspeople. Handbook of

International Perspectives on Early Childhood Education Gower Publishing Company  
This book grounds the education of women and girls in the realities of their lives and experience in diverse areas of the developing world. The case studies range from the Arakambut of Peru to the changing experience of racialized education in South Africa. The contributors take issue with the World Bank's view that the education of girls and women is important primarily as a cost-effective mechanism for making women more economically productive.
