This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of

educational psychology's core ideas. The new edition of Genetics Essentials is now supported in Achieve, Macmillan's new online learning platform. Similar in approach to Ben Pierce's popular and acclaimed Genetics: A Conceptual Approach, this streamlined text covers basic transmission, molecular, and population genetics in just 18 chapters, helping students uncover major concepts of genetics and make connections among those concepts as a way of gaining a richer understanding of the essentials of genetics. The new 5th edition continues this mission by expanding upon the powerful pedagogy and tools that have made this title so successful. New question types, more learning guidelines for students, and an updated art program round out a powerful text,

and improvements to the online resources in Achieve give students the conceptual and problem solving understanding they need for success. Achieve is Macmillan's new online learning platform that supports educators and students throughout the full range of instruction, including assets suitable for pre-class preparation, in-class active learning, and post-class study and assessment. The pairing of a powerful new platform with outstanding biology content provides an unrivaled learning experience.

Coach Education Essentials Human Kinetics Sport coaches have a tremendous influence—positive or negative—in the lives of athletes. Too often, however, the delivery of quality coaching is left to chance. Athletes deserve coaches who create positive environments, foster skill development, and

build character. In *Coach Education Essentials*, leading coach educators and professionals from around the world cover the core elements of coach education and development, and describe how best to understand, cultivate, and evaluate quality coaching. Edited by Kristen Dieffenbach, PhD, and Melissa Thompson, PhD, this text is the most authoritative resource on the topic ever assembled, and the book's contributors represent a who's who of coach education: John Bales Gordon Bloom Trey Burdette Penny Crisfield Edward Cope Kristen Dieffenbach Lori Gano-Overway Brian Gearity Wade Gilbert Daniel Gould Matthew Grant Stephen Harvey Luke Jones Cameron Kiosoglous Clayton Kuklick Sergio Lara-Bercial Sarah McQuade Jenny Nalepa Christine Nash Matt Robinson Ronald Smith Frank Smoll Melissa Thompson Cecile Reynaud Charles

Wilson Jr. Grounded in current research and emerging trends in the field of coach education, *Coach Education Essentials* adheres to the guidelines for coach education and development established by the International Council for Coaching Excellence (ICCE) and is consistent with the ICCE's International Sport Coaching Framework. The chapters cover the roles and responsibilities of the coach across various levels of sport, ranging from prepubescent participation to Olympic-level competition; current models of coaching education, training, and certification used by leading international sport organizations; and the evaluation of coach education. *Coach Education Essentials* is a comprehensive, insightful, and practical resource for those invested in the development and advancement of quality coaching and coaching education. It will be an asset to all

who promote coaching as a profession.

ServeSafe Essentials Routledge

The authoritative, evidence-based coverage you need to safely and competently care for adult, critically ill patients and their families – or prepare for the critical care nursing certification exam Endorsed by the American Association of Critical-Care Nurses and written by top clinical experts in acute care nursing, this textbook thoroughly covers all the need-to-know details on the care of adult, critically ill patients and their families. Supported by helpful tables and algorithms, the book's practical, building-block organization starts with the basics before proceeding to more complex concepts, paralleling the blueprint for the critical care nursing CCRN certification examination. *AACN Essentials of Critical Care Nursing* is divided into four logical sections, which, taken

as a whole, will give you complete understanding of this challenging area of nursing practice: The Essentials – provides fundamental information that new clinicians must understand to provide safe, competent nursing care to all critically ill patients, regardless of their underlying medical diagnosis. Pathological Conditions – covers pathologic conditions and management strategies commonly encountered in all adult critical care units. Advanced Concepts in Caring for the Critically Ill Patient – presents advanced critical care concepts or pathologic conditions that are less common or more specialized than those generally found in adult critical care units. Key Reference Information – includes reference information that you will find helpful in a clinical environment, such as normal laboratory and diagnostic values,

algorithms for advanced cardiac life support, and summary tables of critical care drugs and cardiac rhythms Each chapter begins with Knowledge Competencies that can be used to gauge your progress. This edition is compatible with ECCO (Essentials of Critical Care Orientation), the online program offered by the American Association of Critical-Care Nurses.

A Practical Approach Routledge
Essential Cell Biology provides a readily
accessible introduction to the central concepts
of cell biology, and its lively, clear writing and
exceptional illustrations make it the ideal
textbook for a first course in both cell and
molecular biology. The text and figures are
easy-to-follow, accurate, clear, and engaging
for the introductory student. Molecular detail
has been kept to a minimum in order to provide
the reader with a cohesive conceptual
framework for the basic science that underlies
our current understanding of all of biology,
including the biomedical sciences. The Fourth
Edition has been thoroughly revised, and

covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. Essential Cell Biology, Fourth Edition is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while

assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. For more information and sample material, visit <http://garlandscience.rocketmix.com/>.

"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables

impacting curricular decisions...This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes...92 - 4 Stars" --Doody's Book Reviews
Reorganized and updated to deliver practical guidelines for evidence-based curricular change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators. New chapters address the role of faculty regarding curriculum development and

approval processes in changing educational environments; course development strategies for applying learning theories, educational taxonomies, and team-building; needs assessment and the frame factors model; ADN and BSN and pathways to higher degrees; and planning for doctoral education. The fourth edition continues to provide the detailed knowledge and practical applications necessary for new and experienced faculty to participate in essential components of the academic role—instruction, curriculum, and evaluation. At its core, the text discusses the importance of needs assessment and evidence as a basis for revising or developing new programs and highlights requisite resources and political support. With a focus on interdisciplinary collaboration, the book addresses the growth of simulation, how to help new faculty transition into the academic role, and use of curriculum in both practice and academic settings. Additionally, the book describes the history and evolution of current nursing curricula and presents the theories, concepts, and tools necessary for curriculum development. Chapters include objectives, discussion points, learning activities, references, and a glossary.
