Teaching Students with Special Needs in Inclusive Settings Kids Can Press Ltd Classroom management is a

topic of enduring concern for teachers, administrators, and the public. It consistently ranks as the first or second most serious educational problem in the eyes of the general public, and beginning teachers consistently rank it as their most pressing concern during their early teaching years.

Management problems continue to be a major cause of teacher burnout and job dissatisfaction. Strangely, despite this enduring concern on the part of educators and the public, few researchers have chosen to focus on classroom management or to identify themselves with this critical field. The Handbook of Classroom Management has four primary goals: 1) to clarify the term classroom management; 2) to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers ' managerial tasks; 3) to bring together disparate lines of research and encourage conversations across different areas of inquiry; and 4) to promote a vigorous agenda for future research in this area. To this end, 47 chapters have been organized into 10 sections, each chapter written by a recognized expert in that area. Cutting across the sections and chapters are the following themes: *First, positive teacher-student relationships are seen as the very core of effective classroom

management. *Second, classroom management is viewed as a social and moral curriculum. *Third, external reward and punishment strategies are not seen as optimal for promoting academic and social-emotional growth and self-regulated behavior. *Fourth, to create orderly, productive environments teachers must take into account student characteristics such as age, developmental level, race, ethnicity, cultural background, socioeconomic status, and ableness. Like other research handbooks, the Handbook of Classroom Management provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, and the academic libraries serving these audiences. It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management. The goal of many evangelical educators is to facilitate biblical thinking and the worldview transformation of their students. Yet, aside from upholding a set of moral behaviors or maintaining positions on issues perceived to be "Christian," the goals and aspirations of most evangelical young people differ little from their unbelieving peers. As George Barna has noted, "We have a generation coming up that . . . isn't looking at Christianity to answer spiritual concerns . . . We either change or we lose them." *Worldview as Worship* contends that the approach taken by most evangelical educators to the issue of worldview transformation has neglected to address two fundamental components of worldviews. First, that our initial worldviews are not philosophical systems but rather faith dispositions and

that worldview transformation cannot simply present the biblical worldview as a more rational or logical system, but must address issues of the heart as well as the mind. Second, unlike philosophies that are individual, worldviews are communal and are learned and transformed within the context of community practice. Appealing to Paul's teaching in Romans 12:1-2, *Worldview as Worship* approaches the "renewing of your mind" as the result of the believer's presentation of themselves as a "holy sacrifice . . . which is your spiritual service of worship." The book advocates an approach to worldview transformation that focuses on believers as apprentices rather than simply as students--an approach that holds true to the biblical model of discipleship. As a result, worldview transformation works best when the application of faith to the issues of learning and life are modeled by the faith community and where students are given the opportunity to put faith into practice.
