Shana Abé has entranced countless readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of *The Secret Swan* delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell himself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious

woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That's what happens to Ruri Kell when she accepts Iain MacInnes's invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him. Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

Blue Book for the Year ... Routledge

"I'd rather have one or two of his whiplashing essays in my hands than almost any tome of philosophy". -- Thomas Moore

The World According to Carp OUP
Southern Africa

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed

at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

"This collection of essays brings together some of the finest pieces Hitchens published over the last two decades for the first time in one book, addressing with characteristic wit and

erudition the subjects he is best known for, including: the case against God, faith and religious observance; the case for intervention in Iraq; indictments of towering political figures like Bill and Hillary Clinton, Tony Blair, and Henry Kissinger; and celebrations of the writers and thinkers whose work meant most to him"--

All the anesthesia techniques currently used in veterinary medicine are covered in one concise clinical volume. There's new material on topics such as

laboratory and exotic animals, local anesthesia, and regional anesthesia. Each of the 26 chapters is organized so that species specific and organ specific information can be easily accessed and understood. The contributors list is a virtual "who's who" of veterinary anesthesia. This will be a valuable text for students in veterinary anesthesia and surgery, as well as a great reference for practitioners. Textbook of Veterinary Anesthesia SAGE

The Race is on for Smooth Selling What is smooth selling? Think of the successful America's Cup yachting teams as the metaphor. What it takes to win the America's Cup yacht race can readily be likened to winning in sales: 1. Assess. In business the first step is to assess the four critical areas of sales operations: strategy, methodology, performance metrics, and people. 2. Design. Different challenges call for different sales approaches. For instance, do you

need a sales team of hunters, farmers, or both? 3. Deploy. In business you need to deploy the sales team and support systems. They need to know what the strategy is and what is expected of them to win. 4. Execute. To succeed in business, the execution of the sales plan must be properly managed. Like in sailing, this calls for leadership. Smooth Selling Forever enables small and mid-size business leaders to generate significant, predictable, and sustainable sales growth. Based in the science of selling, when applied correctly and managed vigilantly, smooth selling produces revenue results in a systematic fashion. Healthy Crops Routledge

WHERE HOPE BEGINS is the inspiring true story of a reporter who adopts a family of abuse victims, risking her job and possibly her life. The Man in the Water Simon and Schuster

By using a series of studies of

contemporary mainstream Hollywood movies - "Blue Velvet, Wall Street, Crimes and Misdemeanors, When Harry Met Sally, Sex Lies and Videotape, Do the Right Thing" - Norman Denzin explores the tension between ideas of the postmodern, and traditional ways of analyzing society. The discussion moves between two forms of text: social theory and cinematic representations of contemporary life. Denzin analyzes the ideas of society embedded in poststructuralism, postmodernism, feminism, cultural studies and Marxism through the ideas of key theorists like Baudrillard, Barthes, Habermas, Jameson, Bourdieu and Derrida. He relates these to the problematic of the postmodern self as exposed in cinema centering on the decisive performance of race, gender and class. The Microtomist's Formulary and Guide Wiley

Introduction to Stochastic Dynamic Programming presents the basic theory and examines the scope of applications of stochastic dynamic programming. The book begins with

a chapter on various finite-stage models, illustrating the wide range of applications of stochastic dynamic programming. Subsequent chapters study infinite-stage models: discounting future returns, minimizing nonnegative costs, maximizing nonnegative returns, and maximizing the long-run average return. Each of these chapters first considers whether an optimal policy need exist—providing counterexamples where appropriate—and then presents methods for obtaining such policies when they do. In addition, general areas of application are presented. The final two chapters are concerned with more specialized models. These include stochastic scheduling models and a type of process known as a multiproject bandit. The mathematical prerequisites for this text are relatively few. No prior knowledge of dynamic programming is assumed and only a moderate familiarity with probability—

including the use of conditional expectation—is necessary.

Where Hope Begins John Wiley & Sons
This title is a much needed update of Barbosa's self-published Manual of Basic Techniques in Insect Histology. It is a laboratory manual of 'traditional' and 'modern' insect histology techniques, completely revised using cutting-edge methodology carried out today and includes new immunohistochemical techniques not previously looked at. Insect Histology is designed as a resource for student and professional researchers, in academia and industry, who require basic information on the procedures that are essential for the histological display of the tissues of insects and related organisms.

Two men struggle for possession of a small boat alone on the wasteland of the Sargasso Sea. High adventure!
Uranium in Coal in the Western United States Bantam
This work powerfully asserts the idea that rather than using pesticides, the key to helping crops resist attacks from pests is to improve their strength through natural processes.

Many of industrial agriculture's fundamental principles for fighting disease, in particular the reliance on pesticides and fertilizers, are explained and convincingly challenged and a new set of guiding principles for an ecological agricultural system are presented as a genuine alternative to the widespread use of chemicals.

Insect Histology John Wiley & Sons
Business Logistics Management 4e covers concepts and theories relating to the movement of goods, the coordination of supply chain, the most recent advances in logistics technology, the exchange of information, and the impact on business within the logistics management framework.
