contract law 'Chitty on Contracts' is the foundation on which to base any case. It provides you with the depth of insight you require, so you can confidently cite it in court.

### British Business

Routledge

This book studies how the arms trade has continued to receive generous state subsidies, along with less direct forms of financial and intellectual support from academia in

the UK. It examines the ways in which arms dealing has contributed to the violation of human rights in the Middle East, North Africa, South America, Indochina and other regions of intense conflict, and in doing so, reveals how the industry sells a particular image of itself to the public. The volume: Extensively covers the arms trade and its impact across the world. Shows how the UK arms trade has developed research, investment and consultancy links with universities, museums and other public institutions. Discusses the future of the arms trade

and explores alternatives in terms of job opportunities, economic growth and academic research criteria. A major intervention in international politics, this volume will be of great interest to scholars and researchers of military and strategic studies, international relations, human rights and the social sciences in general. It will also be of interest to policy analysts and defence professionals. Service Design and Service Thinking in Healthcare and Hospital Management Taylor & Francis This book examines the nature of service design and service thinking in healthcare

---

and hospital management. By adopting both a service-based provider perspective and a consumer-oriented perspective, the book highlights various healthcare services, methods and tools that are desirable for customers and effective for healthcare providers. In addition, readers will learn about new research directions, as well as strategies and innovations to develop service solutions that are affordable, sustainable, and consumer-oriented. Lastly, the book discusses policy options to improve the service delivery process and customer satisfaction in the healthcare and hospital sector. The contributors cover various aspects and	fields of application of service design and including service design processes, tools and methods; service blueprints and service delivery; creation and implementation of services; interaction design and user experience; design of service touchpoints and service interfaces; service excellence and service innovation. The book will appeal to all scholars and practitioners in the hospital and healthcare sector who are interested in organizational development, service business model innovation, customer involvement and perceptions, and service experience. Chitty on Contracts Sweet & Maxwell In the United States,	some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and
--	---	---

---

decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote	health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. IT Contracts and Dispute Management Cambridge University Press The key aim of the volume of original papers on the theory and practice of ODE featured in Organization Design and Engineering is to contribute towards overcoming the academic challenges stated above. A secondary aim is to launch the debate about ODE, including whether or	not the debate itself is warranted. Harvesting and Managing Knowledge in Construction Elsevier The European Union's (EU) common Energy Policy commits the EU to generating 20 per cent of total energy consumption from renewables by 2020. The European Commission proposed national renewable energy targets for each Member State and it was suggested that 15 per cent of UK energy be derived from renewables by 2020. Nelson's Directory of Investment Research Brasport This book

constitutes the refereed proceedings of the 14th IFIP WG 8.5 International Conference on Electronic Government, EGOV 2015, held in Thessaloniki, Greece, in August/September 2015 in conjunction with the 7th International Conference on eParticipation, ePart 2015. The 25 revised full papers presented were carefully reviewed and selected from 53 submissions. The papers have been organized in the following topical sections: foundations; open and smart government; services, processes and infrastructure; and

application areas and evaluation.

Computer-Supported Cooperative Work

Springer Science & Business Media

An essential, in-depth analysis of the key legal issues that governments face when adopting cloud computing services.

Information and Communication Technologies for Sustainable Tourism

How To Books

A successful construction business is a knowledge business. And knowledge must be managed effectively to be used efficiently, especially in a complex project-oriented business

such as construction, where skills acquired and lessons learned on one project need to be applied to the next. A holistic approach to knowledge management (KM) is taken in this book to incorporate all of the relevant themes, tackling technological, socio-cultural and organizational issues, with the creation of value as a focus throughout. Information is drawn from a broad range of sources to explain core theories and provide guidance on practical application. Topics covered include: changing business relationships in a knowledge economy knowledge

---

creation processes and theories data, text and knowledge mining techniques the learning construction organization future technology for knowledge management. Written by the authors of the first EU-funded KM research project in the field of construction, this textbook is uniquely well-researched, and is the perfect introduction to KM for students across the built environment. It is also a crucial guide to the topic for practitioners. Legal, administrative, health and safety aspects of large-

scale use of nuclear energy Oxford Handbooks A detailed introduction to interdisciplinary application area of distributed systems, namely the computer support of individuals trying to solve a problem in cooperation with each other but not necessarily having identical work places or working times. The book is addressed to students of distributed systems, communications, information science and socio-organizational theory, as well as to

users and developers of systems with group communication and cooperation as top priorities. The Economics of Defence Policy OECD Publishing IT Contracts and Dispute Management addresses the law relating to technology projects and the practical, procedural and legal issues which arise at each stage. The authors draw on extensive personal experience of successfully managing IT project disputes from their initial stage through to resolution through a range of dispute resolution mechanisms. Being the only published work in this area relating to English law, the book will be a valuable resource to

lawyers acting in connection with procuring an IT project or advising clients on avoidance and resolution of IT project disputes. The Waterlow Stock Exchange Yearbook Taylor & Francis This book constitutes the refereed proceedings of the 19th International Conference on Case-Based Reasoning, held in London, UK, in September 2011. The 32 contributions presented together with 3 invited talks were carefully reviewed and selected from 67 submissions. The presentations and posters covered a wide range of CBR topics of interest both to practitioners and researchers, including CBR methodology covering case representation,

similarity, retrieval, and adaptation; provenance and maintenance; recommender systems; multi-agent collaborative systems; data mining; time series analysis; Web applications; knowledge management; legal reasoning; healthcare systems and planning systems. Occupational Compensation Survey Entrepreneurship and Small Business Understanding the relationship between landslides and climate change is crucially important in planning a proactive approach to hazard and risk management. Advances in geohazard modelling and prediction enable us to be better prepared for the impacts of climate

change, but there is still a need for effective risk management and informed planning. BPM & BPMS: Business Process Management & Business Process Management Systems (2a edition) Springer Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the

---

most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and

Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law. Organization Design and Engineering World Scientific  
If you are looking for an engaging textbook, rich in learning features, which will help you to guide your students through the process of developing and launching a start-up, this is it. With his innovative New

Venture Creation Framework, Paul Burns breaks the venture creation process up into three key phases: Research, Business Model Development, and Launch. At every stage crucial steps and considerations are revealed, providing comprehensive coverage of the subject. Practical advice is combined with academic research, enabling you to run a course which is both relevant and rigorous. The second edition of this popular textbook is essential reading for any undergraduate or postgraduate course in new venture creation. It will also

---

prove useful for shorter courses on entrepreneurship and in enterprise centres and entrepreneurship hubs. New to this Edition: - Thought-provoking video interviews with author Paul Burns examine key questions - Video and audio cases provide an insight into life as an entrepreneur - A fictional running case study offers insight on thematic concepts as applied to one example - A greater variety of case studies, ranging from well-known businesses to smaller, local initiatives - A new Workbook design, with space for students to write their answers and ideas -

Closer alignment of the content to the innovative New Venture Creation Framework, resulting in a textbook that is clear and easy to follow - An interactive ebook version of the text available for purchase  
Arms in Academia  
Routledge  
The Safety of Systems contains the invited papers presented at the fifteenth annual Safety-critical Systems Symposium, held at Bristol, UK in February 2007. The papers included in this volume cover a broad spectrum of important safety issues. They provide a combination of industrial experience and recent developments, and are presented under a variety of headings.

Proceedings CRC Press  
This manual provides technical protocols for musculoskeletal research on a translational basis, i.e. a disease-orientated approach. It offers guidance on various laboratory techniques, including cell culture and molecular biology, histology and histomorphometry, microscopy and bioimaging, laboratory animal models, CT- and MRI-based densitometry and microarchitectural analysis, biomechanics and

---

functional analysis of orthopedic kinesiology, etc. The content is simple and straightforward, with illustrations and step-by-step procedures as an easy experimental reference for personnel in basic and clinical musculoskeletal research and education. This book will provide a unique multidisciplinary platform for various professions OCo not only orthopedics, but also biomedical engineering and biomaterial sciences OCo involving both basic and clinical medicine." e-Business in Construction Springer Artificial Intelligence continues to be one of the most exciting and fast-developing fields of computer science. This book presents the 177 long papers and 123 short papers accepted for ECAI 2016, the latest edition of the biennial European Conference on Artificial Intelligence, Europe ' s premier venue for presenting scientific results in AI. The conference was held in The Hague, the Netherlands, from August 29 to September 2, 2016. ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems (PAIS) 2016, and the Starting AI Researcher Symposium (STAIRS). The papers from PAIS are included in this volume; the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications (FAIA) series. Organized by the European Association for Artificial Intelligence (EurAI) and the Benelux Association for Artificial Intelligence (BNVKI), the ECAI conference provides an opportunity for

---

researchers to present  
and hear about the  
very best research in  
contemporary AI.  
This proceedings will  
be of interest to all  
those seeking an  
overview of the very  
latest innovations  
and developments in  
this field.
